

Saving and Reloading the Cisco Unified SRST Manager Configuration

Restriction

Reloading the system terminates all user sessions and lose all unsaved data.

Procedure

- Step 1** Select **Administration > Control Panel**.
The system displays the Administration Control Panel page.
- Step 2** To save the current configuration, do the following:
- a. Click **Save Configuration**.
 - b. If the system displays a warning or confirmation message, click **OK**.
- Step 3** To reload the saved configuration, do the following:
- a. Click **Reload**. The system displays a warning message stating that this will terminate all user sessions and you will lose any unsaved data.
 - b. Click **OK**.
