

# Collision Handling for Path Update during Bearer Creation

- [Feature Summary and Revision History, on page 1](#)
- [Feature Description, on page 2](#)

## Feature Summary and Revision History

### Summary Data

Applicable Product(s) or Functional Area	MME
Applicable Platform(s)	<ul style="list-style-type: none"> <li>• ASR 5500</li> <li>• VPC-DI</li> <li>• VPC-SI</li> </ul>
Default Setting	Enabled - Always on
Related Changes in This Release	Not Applicable
Related Documentation	<i>MME Administration Guide</i>

### Revision History

Revision Details	Release
Collision Handling for Path-Update during Bearer Creation support added.	21.5.26
Collision Handling for Path-Update during Bearer Creation support added.	21.11.13
Collision Handling for Path-Update during Bearer Creation support added.	12.12.15
First introduced.	21.14

## Feature Description

MME supports processing of NSA path-update procedure under the following collision scenarios:

- Collision between path-update and one or more dedicated-bearer creation initiated by network.
- Collision between path-update and IM-EXIT procedure is in progress.

As part of the above collision handling, MME handles the ERAB-Setup response received from eNB as follows:

- MME processes the ERAB-SETUP response received with cause "Interaction-With-Other-Procedures" from eNB and retries the ERAB-Setup again towards eNB.
- MME processes the ERAB-SETUP response received when Create-Bearer procedure is in suspended state due to path-update in progress.
- MME retries the ERAB-SETUP towards eNB after the successful completion of path-update procedure.
