Applicable Platform(s)	<ul style="list-style-type: none">• ASR 5500• VPC-DI• VPC-SI
Feature Default	Disabled - Configuration Required
Related Documentation	<ul style="list-style-type: none">• <i>MME Administration Guide</i>• <i>Statistics and Counters Reference</i>

Revision History

Revision Details	Release
First Introduced.	21.23.20

Feature Changes

Previous Behavior: The **buffer-ubreq-from-3g-to-4g** CLI configuration command is not designed for dynamic usage in active mme-service. Enabling the CLI dynamically can restart mme-service and can interrupt active-linked subscribers to the mme-service.

New Behavior: The **buffer-ubreq-from-3g-to-4g** CLI configuration command supports dynamic usage in active mme-service.
