

Timezone Commands

- [connectorctl timezone](#), on page 2

connectorctl timezone

To manage the system time zone, use the **connectorctl timezone** command.

```
connectorctl timezone { -l | -s | -t timezone }
```

Syntax Description	Keywords and Variable	Descriptions
	-l	Lists all the time zones.
	-t <i>timezone</i>	Configures one of the timezones. You can list all timezones using the -l keyword.
	-s	Shows the system time zone.
Command History	Release 3	This command is introduced.
