

Managing WLAN Users

Cisco Mobility Express supports creation of local wireless users accounts. These wireless users can be authenticated for WLANs configured to use **Security** as *WPA2 Enterprise* with **Authentication Server** set to *AP* or Guest WLANs configured to use **Guest Type** as *Captive Portal (AP)* and **Captive Portal Type** set to *Require Username & Password*.

Managing WLAN Users

To create these users, follow the steps below:

Procedure

Step 1 Navigate to **Wireless Settings > WLAN Users** and click on the **Add WLAN user** button.

User Name	Guest User	Lifetime (Seconds)	wlan Profile	Password	Description
-----------	------------	--------------------	--------------	----------	-------------

Step 2 Enter the following to configure the wireless user account.

- A. **User Name**—Username of the wireless user
- B. **Guest User**—For Guest wireless user, enable the checkbox
- C. **Lifetime**—For Guest User, you can define the user account validity. Default is 86400 seconds (or, 24 hours) from the time of its creation
- D. **WLAN Profile**—Select the WLAN that this user will connect
- E. **Password**—Enter the password for the user account
- F. **Description**—Additional details or comments on the user
- G. Click on the icon pointed by the Red arrow to create the account

The screenshot shows the Cisco Aironet 1830 Series Mobility Express interface for managing WLAN users. The 'WLAN USERS' section displays 0 users. A table below the section has a plus icon in its header, which is highlighted by a red arrow. The table contains one user entry: 'jdoe', with a 'Guest User' checkbox, a 'Lifetime (Seconds)' of 86400, a 'WLAN Profile' of 'WestAutoB...', and a 'Description' of 'Mechanic'. A modal form for adding a new user is open, showing fields for 'New Password' and 'Confirm Password'.

User Name	Guest User	Lifetime (Seconds)	wlan Profile	Password	Description
jdoe	<input type="checkbox"/>	86400	WestAutoB...	Mechanic

The screenshot shows the Cisco Aironet 1830 Series Mobility Express interface for managing WLAN users. The 'WLAN USERS' section displays 1 user. A table below the section has a plus icon in its header. The table contains one user entry: 'jdoe', with a 'Guest User' checkbox, a 'Lifetime (Seconds)' of N/A, a 'WLAN Profile' of 'WestAutoBody-E...', and a 'Description' of 'Mechanic'. The user entry is highlighted with a red box.

User Name	Guest User	Lifetime (Seconds)	wlan Profile	Password	Description
jdoe	No	N/A	WestAutoBody-E...	Mechanic
