

## Preface

---

**Revised: July, 2015,**

This section discusses the objectives, audience, conventions, and organization of the *CT5760 Controller Deployment Guide* and provides general information about Cisco IOS software documentation.

Cisco documentation and additional literature are available in a CD-ROM package, which ships with your product. The Documentation CD-ROM, a member of the Cisco Connection Family, is updated monthly. Therefore, it might be more up to date than printed documentation. To order additional copies of the Documentation CD-ROM, contact your local sales representative or call customer service. The CD-ROM package is available as a single package or as an annual subscription.

## Objectives

This document introduces two new controllers within the Cisco Unified Access architecture and provides general guidelines for their deployment. The purpose of this document is to:

- Provide an overview of the new Cisco 5760 Next Generation Wireless LAN Controller and the Next Generation Catalyst 3850 Wired/Wireless Switch.
- Provide design recommendations and deployment considerations specific to the Centralized Access deployment.

## Audience

This publication is for experienced network administrators who configure and maintain Cisco wireless LAN controllers and Cisco lightweight access points.

## Cisco IOS Software Documentation

In addition to the information provided in this publication, you might need to refer to the Cisco IOS documentation set. The Cisco IOS software documentation is divided into nine modules and two master indexes. Each module consists of two books: a configuration guide and a corresponding command reference. Chapters in a configuration guide describe protocols, configuration tasks, and Cisco IOS software functionality and contain comprehensive configuration examples. Chapters in a command reference provide complete command syntax information. Each configuration guide can be used in conjunction with its corresponding command reference.

# Organization

This chapter describes the contents of each chapter in this document.

**Table 1**            **Organization**

<b>Chapter</b>	<b>Title</b>	<b>Description</b>
Chapter 1	Product Overview	Overview of controllers
Chapter 2	Supported Features	Overview of supported features
Chapter 3	CT5760 Centralized Configuration Example	Example of CT5760 centralized configuration
Chapter 4	Mobility Architecture	Overview of mobility components in the new mobility architecture
Chapter 5	Bring Your Own Device (BYOD) Security Configuration	Description of self-service additions of personal devices
Chapter 6	Secure WLAN configuration	Configuration on Catalyst 3850/WLC5508
Chapter 7	802.11ac Support on WLC5760 and Catalyst 3850	Overview of 802.11ac support on WLC5760 and Catalyst 3850
Chapter 8	Radio Resource Management Configuration	Radio Resource Management (RRM) software
Chapter 9	CleanAir	CleanAir - spectrum intelligence solution
Chapter 10	Configuring ClientLink (Beamforming)	Overview of configuring ClientLink (Beamforming)
Chapter 11	High Availability	Overview of high availability
Chapter 12	Interface Group	Overview of groups of interfaces
Chapter 13	Multicast Configuration	Overview of multicast configuration
Chapter 14	Installing and Upgrading Software Image on a CT5760	Overview of how to install and upgrade software image on a CT5760 controller
Chapter 15	Adding WLC to Prime	Overview of how to add WLC to Prime
Chapter 16	Application Visibility and Flexible Netflow	Overview of Application Visibility and Control and Flexible Netflow
Chapter 17	Service Discovery Gateway (mDNS Gateway)	Overview of Service Discovery Gateway (mDNS Gateway)
Chapter 18	QoS Configuration	Introduction of Cisco IOS® software on the WLC5760 controller

## Command Syntax Conventions

[Table 2](#) describes the syntax used with the commands in this document.
