

# Cisco Firepower Management

## Center(FMC) Command Injection Vulnerability

**Severity:** Medium  
**Product:** Cisco Firepower Management Center (FMC) 1.0  
**Version:** 1.0  
**CVSS:** 6.3  
**Workarounds:** No workarounds available  
**Cisco IDs:** CSCw23048, CSCw23029

Command injection vulnerability in Cisco Firepower Management Center (FMC) 1.0 allows an attacker to execute arbitrary commands on the device.

### Impact

Cisco Firepower Management

Center (FMC) 1.0 is vulnerable to a command injection vulnerability in the Web UI.

The vulnerability is located in the `admin` page of the FMC Web UI. An attacker can inject arbitrary commands into the `cmd` parameter of the `admin` page.

The vulnerability is located in the `admin` page of the FMC Web UI. An attacker can inject arbitrary commands into the `cmd` parameter of the `admin` page.

The vulnerability is located in the `admin` page of the FMC Web UI. An attacker can inject arbitrary commands into the `cmd` parameter of the `admin` page.

For more information, see the [Cisco Security Advisory: Cisco Firepower Management Center \(FMC\) 1.0 Command Injection Vulnerability](https://tools.cisco.com/security/center/content/CiscoSecurityAdvisory/cisco-sa-fmc-cmd-inj-Z3B5MY35).

For more information, see the [Cisco Security Advisory: Cisco Firepower Management Center \(FMC\) 1.0 Command Injection Vulnerability](https://tools.cisco.com/security/center/content/CiscoSecurityAdvisory/cisco-sa-fmc-cmd-inj-Z3B5MY35).

### Exploitation

Exploitation of the vulnerability is possible via the Web UI.

The exploit is a simple command injection into the `cmd` parameter of the `admin` page. For example, an attacker can inject the command `cat /etc/passwd` to retrieve the contents of the `/etc/passwd` file.

The exploit is a simple command injection into the `cmd` parameter of the `admin` page. For example, an attacker can inject the command `cat /etc/passwd` to retrieve the contents of the `/etc/passwd` file.
