Medium - Cisco Duo Two-Factor Authentication for macOS ³Duo Authentication for Windows Logon and RDP

Medium

Cisco Duo Two-Factor Authentication for macOS ³Duo Authentication for Windows Logon and

RDP

This advisory describes a vulnerability in Cisco Duo Two-Factor Authentication for macOS ³Duo Authentication for Windows Logon and RDP.

The vulnerability allows an attacker to replay a captured authentication request to the Duo server, which will then authenticate the user without requiring a second factor.

For more information, see the [Cisco Security Advisory](https://sec.cloudapps.cisco.com/security/center/content/CiscoSecurityAdvisory/cisco-sa-duo-replay-knuNKd).

CVSS: 6.3

Workarounds: No workarounds available
