Inleiding

Dit document beschrijft hoe u Cisco Identity Services Engine (ISE) 2.3 integratie met Facebookaanmeldingsgegevens kunt configureren voor een gewaarmerkte gast.

Voorwaarden

Vereisten

Cisco raadt kennis van de volgende onderwerpen aan:

- Configuratie van Identity Services Engine (ISE)
- Basisconfiguratie van Facebook-app

Gebruikte componenten

De informatie in dit document is gebaseerd op de volgende software- en hardware-versies:

- Cisco ISE versie 2.3
- Facebook Social Login
- Cisco draadloze LAN-controller (WLC) versie 8.3.10.2.0

De informatie in dit document is gebaseerd op de apparaten in een specifieke laboratoriumomgeving. Alle apparaten die in dit document worden beschreven, hadden een opgeschoonde (standaard)configuratie. Als uw netwerk live is, moet u de potentiële impact van elke opdracht begrijpen.

Netwerkdiagram

Configuratie

De aangeboden app is een voorbeeld en niet de door Cisco aanbevolen configuratie.

1. Facebook-app configureren

Ga naar https://developers.facebook.com en registreer de nieuwe app.

Het dashboard van de toepassing toont **App ID** en **App Secret**-toets, die op ISE gebruikt zullen worden om de Externe sociale inlognaam te maken.

Maak de gemaakte app bekend.

	LOGIN PERMISSIONS		

2. Integreren met ISE in de Facebook-app

Gebruik de onderstaande informatie om de Facebook-app te integreren met Cisco ISE.

Navigeer naar Administratie > identiteitsbeheer > Externe Identiteitsbronnen > Sociale Login en voeg nieuwe winkel toe.

Configureer de ISE Guest Portal door sociale inloging toe te staan.

dentity Sen	vices Engine	Home + Context Visibility + Ope	rations + Policy + Adminis	work Centers		License Warning 🔺 🔍
Network Access	- Guest Access	TrustSec + BYOD + Profiler +	Posture + Device Administration	▶ PassiveID

		Last name				
		🗹 Email address				

Nadat u het ISE Guest Portal hebt geconfigureren om sociaal inloggen mogelijk te maken, wordt de sociale inlognaam ingevuld met URL's en moet deze worden toegevoegd aan de **instellingen** van de Facebook-app, **Valid Outh RED URL's**.

Voeg Facebook-aanmelding toe van producten en voeg geldige OAuth-URL's toe.

URL's worden automatisch op ISE gegenereerd nadat deze de ISE Portal met Facebook heeft verbonden Externe Sociale inlognaam.

3. Verificatie- en autorisatiebeleid configureren

De ISE Configuration volgt dezelfde configuratiesstappen als de Guest CWA (Central Web Authentication).

(Raadpleeg voor configuratiestappen in ISE CWA het onderstaande document:

leaving https://www.cisco.com/c/en/us/support/docs/security/identity-services-engine/115732-central-web-auth-00.html)
