# Hoe u Office 365 kunt vrijstellen van verificatie en decryptie op Cisco web security applicatie (WSA)

## Inhoud

Inleiding Configuratiestappen 1. Maak een aangepaste URL-categorie met de Office365 externe voeding 2. Een identificatieprofiel voor het verkeer van Office 365 maken 3. Office 365 van het decryptiebeleid vrijstellen Referentie

## Inleiding

In dit artikel wordt het proces beschreven om Office 365 te vrijstellen van verificatie en decryptie op de Web Security Appliance (WSA). Er zijn een aantal bekende compatibiliteitsproblemen met Office 365 en proxy's, en vrijstelling van Office 365 voor verkeersverificatie en decryptie kan helpen bij een aantal van deze problemen.

Opmerking: Dit is geen volledige bypass van web proxy en het vrijstellen van verkeer van decryptie belet de WSA om het gecodeerde HTTPS-verkeer dat door Office 365-klanten gegenereerd is, te inspecteren.

## Configuratiestappen

Overzicht:

- 1. Een aangepaste URL-categorie maken met de Office365 externe voeding
- 2. Een identificatieprofiel maken voor het verkeer van Office 365
- 3. Office 365 te vrijstellen van decryptie-beleid

Opmerking: Dit proces vereist gebruik van de dynamisch updaten van Office 365 externe JSON-feed die alle URL's/IP-adressen bevat die aan Office 365 zijn gekoppeld.

Opmerking: Ondersteuning voor deze feed is aanwezig in AsyncOS versie 10.5.3 en volgende versie 11.5.

### 1. Maak een aangepaste URL-categorie met de Office365 externe voeding

- Navigeren in naar Web Security Manager ->Aangepaste en externe URL-categorieën
- Klik op "Category toevoegen"
- Voeg een naam aan de categorie toe, selecteer het categorietype als "Categorie Externe

Levensvoeders" en selecteer "Office 365 Web Service" optie.

- Klik op "**Test starten**" als u de mogelijkheid van de WSA wilt testen om de JSON-feed (Office 365 JavaScript Object Notion) van de Office te downloaden.
- Stel onderaan de optie "Auto Update the Feed" in op "Uourly" met een interval van 00:05 (elke 5 minuten)
- Klik op de knop "Indienen".

### **Custom and External URL Categories: Add Category**

Catagory Names	
Category Name:	Office365
List Order:	1
Category Type:	External Live Feed Category
Routing Table:	Management
Feed File Location: 🕐	○ Cisco Feed Format ⑦ ○ Office 365 Feed Format ⑦ • Office 365 Web Service
	Web Service URL: https://endpoints.office.com/enc
	Start Test
	Checking DNS resolution of feed server Success: Resolved 'endpoints.office.com' address: 138.91.80.132
	Betrieving feed content from server
	Success: Downloaded and Parsed the feed file.
	Test completed successfully.
Excluded Sites: 🕐	Sort URLs
	Click the Sort URLs button to sort all site
	URLs in Alpha-numerical order.
	la l
	(e.g. 10.0.0.1, 2001:420:80:1::5, example.com.)
Advanced	Match specific URLs by regular expressions.
Auto Update the Feed:	O Do not auto update

### 2. Een identificatieprofiel voor het verkeer van Office 365 maken

- Navigeren in naar Web Security Manager ->Identificatieprofielen
- Klik op "Identificatieprofiel toevoegen"
- Wijs een naam toe, stel "Identificatie en verificatie" in op "Vrijstellen van authenticatie/identificatie".
- Klik op de knop "Geavanceerd" en klik op de link naast "URL Categorieën"
- Vind de categorie die u in de vorige stap hebt gemaakt, en selecteer die categorie, en ga vervolgens naar de onderkant van de pagina en klik op de knop **Gereed**.

#### Identity Profilies: Policy "Office365.ID": Membership by URL Categories

dvanced Membership Definition: URL Category							
Select any row below to use that URL Category as membership criteria. Leave all rows unselected if membership by URL Category is not desired.							
Custom and External URL Categories							
		Add					
Category	Category Type	Select all					
Office365	External Feed						

Het identificatieprofiel moet nu als volgt zijn:

#### **Identification Profiles: Office365.ID**

Client / User Identification Profile Settings	
Z Enable Identification Profile	
Name: 🕐	Office365.1D (e.g. my 11 Prome)
Description:	
Insert Above:	1 (Global Profile)
User Identification Method	
Identification and Authentication: ?	Exempt from authentication / identification This option may not be valid if any preceding Identification Profile requires authentication on all subnets.
Membership Definition	
Membership is defined by any combination of the I	ollowing options. All criteria must be met for the policy to take effect.
Define Members by Subnet:	(examples: 10.1.1.0, 10.1.1.0/24, 10.1.1.1-10, 2001:420:80:1::5, 2000:db8::1-2000:db8::10)
Define Members by Protocol:	HTTP/HTTPS     Native FTP
▽ Advanced	Use the Advanced options to define or edit membership by proxy port, destination (URL Category), or User Agents. The following advanced membership criteria have been defined:
	Proxy Ports: None Selected
l l	URL Categories: Office365
	The Advanced options may be protocol-specific. For instance, user agent strings are applicable only for HTTP and decrypted HTTPS. Similarly, URL Categories, including Custom URL Categories are not applicable for SOCKS transactions or transparent HTTPS (unless decrypted). When Advanced options that do not apply to a protocol are selected, no transactions in that protocol will match this Identity, regardless of the protocol selection above.
Cancel	Submit

• Klik op de knop "Indienen" onder op het scherm.

### 3. Office 365 van het decryptiebeleid vrijstellen

Navigeren in naar Web Security Manager ->Decryptie beleid

- Klik op "Toevoegen beleid"
- Pas een naam aan en selecteer vervolgens in het veld "Identificatieprofielen en gebruikers" de optie "Eén of meer identificatieprofielen selecteren" en kies vervolgens uw Office 365-identiteit uit de vorige stap.
