

Cisco Smart+Connected Smart Device License for Property Developers

The Cisco[®] Smart+Connected Smart Device License for property developers is a convenient and flexible way for homeowners to monitor and manage the Cisco Smart+Connected[™] Residential Solution using a smart device, tablet, or computer. It's also an affordable way to add more screens to interact with and manage home systems, including lighting, temperature, energy, security, music, movies, and more.

With the Cisco Smart+Connected Smart Device License, once the Cisco SC Residence app is downloaded onto the smart device, the license enables the user to manage the home using their smart device from virtually anywhere in the world. All this happens securely because only authorized devices can connect to the home system. The Smart Device License comes as either a subscription-based or perpetual license. The Smart Device License enables any number of supported devices to control the home's systems.

Compatibility Matrix

Table 1 lists product compatibility specifications for Cisco Smart+Connected Smart Device Licenses.

Table 1. Cisco Smart+Connected Smart Device License Compatibility and Comparison

| | iPhone/iPod/iPod Touch | iPad | Android | PC/MAC |
