

APPENDIX **B**

MIB Reference

This appendix lists the MIBs supported by the NME-APA module. A MIB (Management Information Base) is a database of objects that can be monitored by a network management system (NMS).

Supported MIBs

The NME-APA module supports the following MIBs:

- MIB-II
- ENTITY-MIB
- ENTITY-STATE-MIB (RFC-4268).
- HOST-RESOURCES-MIB
- CISCO-SYSLOG-EVENT-EXT-MIB
- CISCO-CONFIG-COPY-MIB
- CISCO-SERVICE-CONTROL-RDR-MIB
- CISCO-SERVICE-CONTROL-TP-MIB
- CISCO-SERVICE-CONTROLLER-MIB
- CISCO-SERVICE-CONTROL-SUBSCRIBERS-MIB
- CISCO-SERVICE-CONTROL-LINK-MIB
- CISCO-ENTITY-ALARM-MIB
- CISCO-TELNET-SERVER-MIB

For full details about these MIBs see the *Cisco Network Module Enhanced-Application Performance Assurance (NME-APA) MIB Reference Guide* .
