

What's New in Cisco Product Documentation

December 2010

What's New in Cisco Product Documentation lists new and revised Cisco documentation since the last release of this monthly publication. To subscribe to the *What's New in Cisco Product Documentation* RSS feed, paste this URL into your RSS reader:

http://www.cisco.com/cdc_content_elements/rss/whats_new/whatsnew_rss_feed.xml

Previous releases of the *What's New in Cisco Product Documentation* are available at the following URL:

<http://www.cisco.com/en/US/docs/general/whatsnew/archive/archive.html>

Cisco Product Documentation Collaboration Tools

Cisco DocWiki

You can collaborate on Cisco documentation at this URL:

<http://docwiki.cisco.com>

Cisco Icon Library

Cisco icons are globally recognized and generally accepted as standard for network icon topologies. Cisco icons are available for download at the following URL:

<http://www.cisco.com/web/about/ac50/ac47/2.html>

Cisco International Websites

To find international Cisco websites, go to <http://www.cisco.com>, and click *Worldwide [change]* at the top of the page.

Americas Headquarters:

Cisco Systems, Inc., 170 West Tasman Drive, San Jose, CA 95134-1706 USA

Cisco Internetworking Terms and Acronyms (ITA)

Provides accurate and consistent definitions of internetworking terms and acronyms. These terms are specific to Cisco products, technologies, or services; they could also have an additional definition or description that is unique to Cisco.

This file does not duplicate industry-standard terms for which definitions can be found in other sources.

http://docwiki.cisco.com/wiki/Category:Internetworking_Terms_and_Acronyms_%28ITA%29

Cisco Product Photography

Cisco allows third parties to use Cisco product photography. You can download the conditions for using Cisco product photography from the following URL:

http://resources.cisco.com/app/tree.taf?asset_id=64535&public_view=true

Technical Documentation Ideas Forum

Allows you to communicate with other customers and Cisco technical writers. You can share your ideas about Cisco documentation on the Technical Documentation Ideas Forum.

Application Networking Services

New Documents

- [*API Reference Guide for Cisco Application Networking Manager 4.1*](#)
Explains how to use the ANM 4.1 Web Services application program interface (API).
- [*Cisco 4700 Series Application Control Engine Appliance Command Reference \(Software Version A4\(1.0\) and Earlier\)*](#)
Provides an alphabetical list of all command line interface (CLI) commands including syntax, options, and related commands.
- [*Cisco 4700 Series Application Control Engine Appliance Application Acceleration and Optimization Configuration Guide*](#)
Explains how to configure the application acceleration and optimization functions on the ACE.
- [*Cisco 4700 Series Application Control Engine Appliance Administration Guide*](#)
Explains how to perform administration tasks on the ACE. These tasks include:
 - Performing the Initial setup
 - Establishing remote access
 - Configuring class maps and policy maps
 - Managing the ACE software
 - Configuring SNMP
 - Configuring redundancy

- [*Cisco 4700 Series Application Control Engine Appliance Device Manager GUI Configuration Guide*](#)

Explains how to use the Device Manager and how to configure the Cisco 4700 series Application Control Engine (ACE) appliance, software release A4(1.0).

- [*Cisco 4700 Series Application Control Engine Appliance Routing and Bridging Configuration Guide*](#)

Explains how to configure the routing and bridging features of the ACE. This guide provides a routing overview and explains how to perform ACE configuration tasks. This includes:

- Configuring Ethernet interface ports and VLANs,
- Routing
- Bridging
- Performing Address Resolution Protocol (ARP), and Dynamic Host Configuration Protocol (DHCP)

- [*Cisco 4700 Series Application Control Engine Appliance Security Configuration Guide*](#)

Explains how to configure the ACE security features. This includes

- Creating security access control lists (ACLs)
- Performing user authentication and accounting using a TACACS+, RADIUS, or LDAP server
- Performing application protocol and HTTP deep packet inspection
- Performing TCP/IP normalization and termination parameters
- Performing network address translation (NAT)

- [*Cisco 4700 Series Application Control Engine Appliance Server Load-Balancing Configuration Guide*](#)

Explains how to configure ACE server load-balancing. This includes:

- Server health monitoring
- Real servers and server farms
- Stickiness
- Load-balancing policies
- Firewall load balancing
- TCL scripts

- [*Cisco 4700 Series Application Control Engine Appliance SSL Configuration Guide*](#)

Explains how to configure SSL on the ACE, including SSL certificates and keys, SSL initiation, SSL termination, and end-to-end SSL.

- [*Cisco 4700 Series Application Control Engine Appliance System Message Guide*](#)

Explains how to configure system message logging on the ACE and lists. It also describes the system log messages generated by the ACE.

- [*Cisco 4700 Series Application Control Engine Appliance Virtualization Configuration Guide*](#)

Explains instructions on how to operate your ACE in a single-context or in multiple-contexts. Multiple-contexts use the concept of virtualization to partition your ACE into multiple virtual devices.

- [*Cisco Wide Area Application Services Configuration Guide \(Software Version 4.3.1\)*](#)

Describes how to configure and use WAAS devices.

- [*Cisco Wide Area Application Services Command Reference \(Software Version 4.3.1\)*](#)
Lists and describes each WAAS CLI command.
- [*Cisco Wide Area Application Services vWAAS Installation and Configuration Guide \(Software Version 4.3.1\)*](#)
Describes how to install and configure virtual WAAS (vWAAS).
- [*Cisco Wide Area Application Services API Reference \(Software Version 4.3.1\)*](#)
Describes how to use the WAAS Web Services API to monitor a WAAS network.
- [*FAQs and Troubleshooting Guide for Cisco Services Ready Engine Virtualization*](#)
Provides FAQs and troubleshooting information for Cisco Services Ready Engine Virtualization.
- [*Finding Documentation for Cisco Application Networking Manager 4.1*](#)
Provides links to ANM 4.1 documentation on Cisco.com.
- [*Installation and Configuration Guide for Cisco Services Ready Engine Virtualization*](#)
Provides installation and configuration information that allows you to set up and use Cisco Services Ready Engine Virtualization.
- [*Installation Guide for the Cisco Application Networking Manager 4.1*](#)
Explains how to install ANM 4.1 on a dedicated server and how to upgrade to ANM 4.1.
- [*Installation Guide for the Cisco Application Networking Manager 4.1 Virtual Appliance*](#)
Explains how to install ANM 4.1 on a VMware virtual appliance.
- [*Open Source Used In Cisco Services Ready Engine Virtualization Release: 1.0*](#)
Provides the licenses and notices for open source software that is used in Cisco Services Ready Engine Virtualization.
- [*Release Note for the Cisco 4700 Series Application Control Engine Appliance \(Software Version A4\(1.X\)\)*](#)
Describes the resolved and open caveats, and CLI command changes for software version A4(1.0) of the ACE appliance.
- [*Release Note for the Cisco Application Networking Manager \(Software Version 4.1\)*](#)
Describes the new features and caveats for ANM 4.1.
- [*Release Notes for Cisco Services Ready Engine Virtualization*](#)
Provides hardware and software requirements, and open caveats for Cisco Services Ready Engine Virtualization.
- [*Release Note for Cisco Wide Area Application Services \(Software Version 4.3.1\)*](#)
Describes the new features, resolved and open caveats, CLI command changes, and monitoring API changes for software version 4.3.1.
- [*Supported Device Tables for the Cisco Application Networking Manager 4.1*](#)
Lists the Cisco products that ANM 4.1 supports.
- [*User Guide for the Cisco Application Networking Manager 4.1*](#)
Explains how to configure and use ANM 4.1.

Revised Documents

- [Cisco Wide Area Application Services Upgrade Guide \(Software Versions 4.2.x and 4.3.x\)](#)
Describes how to upgrade to WAAS 4.2 or 4.3.
- [Cisco WAAS Troubleshooting Guide for Release 4.1.3 and Later](#)
Provides troubleshooting information for WAAS.

Cisco Interfaces and Modules

New Documents

- [Cisco Application Control Engine Module Command Reference \(Software Version A4\(1.0\) and Earlier\)](#)
Provides an alphabetical list of all command line interface (CLI) commands including syntax, options, and related commands.
- [Cisco Application Control Engine Module Administration Guide](#)
Explains how to perform administration tasks on the ACE. These tasks include:
 - Performing initial setup
 - Establishing remote access
 - Configuring class maps and policy maps
 - Managing the ACE software
 - Configuring SNMP
 - Configuring redundancy
- [Cisco Application Control Engine Module Routing and Bridging Configuration Guide](#)
Explains how to configure the routing and bridging features of the ACE. This guide provides a routing overview and explains how to perform ACE configuration tasks. This includes:
 - Configuring Ethernet interface ports and VLANs
 - Routing
 - Bridging
 - Performing Address Resolution Protocol (ARP), and Dynamic Host Configuration Protocol (DHCP)
- [Cisco Application Control Engine Module Security Configuration Guide](#)
Explains how to configure the ACE security features. This includes:
 - Creating security access control lists (ACLs)
 - Performing user authentication and accounting using a TACACS+, RADIUS, or LDAP server
 - Performing application protocol and HTTP deep packet inspection
 - Performing TCP/IP normalization and termination parameters
 - Performing network address translation (NAT)
- [Cisco Application Control Engine Module Server Load-Balancing Configuration Guide](#)
Explains how to configure ACE server load-balancing. This includes:
 - Server health monitoring

- Real servers and server farms
- Stickiness
- Load-balancing policies
- Firewall load balancing
- TCL scripts
- [Cisco Application Control Engine Module SSL Configuration Guide](#)
Explains how to configure SSL on the ACE, including SSL certificates and keys, SSL initiation, SSL termination, and end-to-end SSL.
- [Cisco Application Control Engine Module System Message Guide](#)
Explains how to configure system message logging on the ACE and lists. It also describes the system log messages generated by the ACE.
- [Cisco Application Control Engine Module Virtualization Configuration Guide](#)
Explains how to operate your ACE in a single-context or in multiple-contexts. Multiple-contexts use the concept of virtualization to partition your ACE into multiple virtual devices.
- [Release Note for the Cisco Application Control Engine Module](#)
Provides a list of new features and the resolved and open caveats for Software Version A4(1.0).

Cisco IOS and NX-OS Software

New Documents

- [Cisco Nexus 7000 Series NX-OS FabricPath Configuration Guide, Release 5.x](#)
Explains how to use and configure Layer 2 FabricPath networks.
- [Configuring Feature Set for FabricPath](#)
Describes the initial setup of the Layer 2 FabricPath software.
- [Configuring the Cisco Nexus 2000 Series Fabric Extender](#)
Describes the setup and configuration of the Cisco Nexus 2000 Fabric Extender connected to Cisco Nexus 7000 devices running Cisco NX-OS Release 5.x.
- [Scripting with Tcl](#)
Explains how to run TCL commands and scripts on the Cisco Nexus 7000 series devices running Cisco NX-OS Release 5.x.

Revised Documents

- [Cisco Nexus 7000 Command Reference Master Index, Release 5.x](#)
Provides a list of the commands to configure Cisco Nexus 7000 series devices running Cisco NX-OS Release 5.x.
- [Cisco Nexus 7000 Series NX-OS Fundamentals Command Reference, Release 5.x](#)
Provides a list of commands to configure the fundamentals of Cisco Nexus 7000 series devices running Cisco NX-OS Release 5.x.

- [*Cisco Nexus 7000 Series NX-OS Fundamentals Configuration Guide, Release 5.x*](#)
Explains how to configure the fundamentals of Cisco Nexus 7000 series devices running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS High Availability and Redundancy Command Reference, Release 5.x*](#)
Provides a list of commands to configure and display information about the high availability feature of Cisco Nexus 7000 series devices running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS High Availability and Redundancy Guide, Release 5.x*](#)
Explains how to configure the high availability feature of Cisco Nexus 7000 series devices running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS Interfaces Command Reference, Release 5.x*](#)
Provides a list of commands to configure and display information for the interfaces of Cisco Nexus 7000 series devices running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS Interfaces Configuration Guide, Release 5.x*](#)
Explains how to configure the interfaces of Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco Nexus7000 Series NX-OS Layer 2 Switching Command Reference, Release 5.x*](#)
Provides a list of commands to configure and display information for the VTP and private VLAN trunk port features.
- [*Cisco Nexus 7000 Series NX-OS Layer 2 Switching Configuration Guide, Release 5.x*](#)
Explains how to configure the VLAN Trunking Protocol (VTP) for version 1 and 2 and pruning, as well as private VLAN trunk ports.
- [*Cisco Nexus 7000 Series NX-OS Multicast Routing Command Reference, Release 5.x*](#)
Provides a list of commands to configure multicast routing on the Cisco Nexus 7000 series devices running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS Multicast Routing Configuration Guide, Release 5.x*](#)
Explains how to configure multicast routing on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS OTV Command Reference, Release 5.x*](#)
Provides a list of commands to configure the OTV feature on the Cisco Nexus 7000 series devices running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS OTV Configuration Guide, Release 5.x*](#)
Explains how to configure OTV on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS Quality of Service Command Reference, Release 5.x*](#)
Provides a list of commands to configure the quality of service feature on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS Quality of Service Configuration Guide, Release 5.x*](#)
Explains how to configure the quality of service feature on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.

- [*Cisco Nexus 7000 Series NX-OS Release Notes, Release 5.1*](#)
Describes the features, caveats, and limitations for Cisco NX-OS software for use on the Cisco Nexus 7000 series switches.
- [*Cisco Nexus 7000 Series NX-OS Security Command Reference, Release 5.x*](#)
Provides a list of commands to configure the security features on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS Security Configuration Guide, Release 5.x*](#)
Explains how to configure the security features on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS System Management Command Reference, Release 5.x*](#)
Provides a list of commands to configure the system management features on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS System Management Configuration Guide, Release 5.x*](#)
Explains how to configure the system management features on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS Unicast Command Reference, Release 5.x*](#)
Provides a list of commands to configure the unicast routing protocols and first-hop redundancy protocols on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS Unicast Routing Configuration Guide, Release 5.x*](#)
Explains how to the configure unicast routing protocols and first-hop redundancy protocols on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS Virtual Device Context Command Reference, Release 5.x*](#)
Provides a list of commands to configure VDCs on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco Nexus 7000 Series NX-OS Virtual Device Context Configuration Guide, Release 5.x*](#)
Explains how to configure VDCs on the Cisco Nexus 7000 series devices, running Cisco NX-OS Release 5.x.
- [*Cisco NX-OS Licensing Guide*](#)
Provides licensing information for the Cisco NX-OS switches.
- [*Cisco NX-OS System Messages Reference*](#)
Describes the system messages for the Cisco NX-OS switches.

Network Management and Automation

New Documents

- [*API Reference Guide for CiscoWorks Network Compliance Manager 1.6*](#)
Contains information on Java, SOAP, and PERL APIs.
- [*Cisco DCNM FabricPath Configuration Guide, Release 5.x*](#)
Explains how to manage FabricPath using Cisco DCNM.

- [*Configuration Guide for High Availability Distributed System on Microsoft SQL Server*](#)
Explains how to install, configure, and administer the High Availability Distributed System on Microsoft SQL Server 2005 and SQL Server 2008.
- [*Configuration Guide for High Availability Distributed System on Oracle*](#)
Explains how to install, configure, and administer the High Availability Distributed System on Oracle 10g (10.2.0.4) and 11g (11.1.0.7.0).
- [*Documentation Guide for CiscoWorks Network Compliance Manager 1.6*](#)
Lists and describes the documents that comprise the CiscoWorks Network Compliance Manager (NCM) documentation set.
- [*Horizontal Scalability User Guide for CiscoWorks Network Compliance Manager 1.6*](#)
Explains how to configure Horizontal Scalability and add additional NCM Cores to a Horizontal Scalability configuration.
- [*Installation and Upgrade Guide for CiscoWorks Network Compliance Manager 1.6*](#)
Explains how to install CiscoWorks NCM 1.6. It also explains how to upgrade from previous versions of CiscoWorks NCM to CiscoWorks NCM 1.6.
- [*NNM Integration User Guide for CiscoWorks Network Compliance Manager 1.6*](#)
Explains how to integrate HP Network Node Manager (NNMi) with CiscoWorks NCM on Windows, Linux, and Solaris platforms.
- [*Open Source Used in CiscoWorks Network Compliance Manager 1.6*](#)
Describes the third party and open source software used in CiscoWorks NCM 1.6.
- [*Release Notes for CiscoWorks Network Compliance Manager 1.6*](#)
Lists new features, documentation updates, supported platforms and databases, hardware requirements, known issues, and resolved issues.
- [*Satellite User Guide for CiscoWorks Network Compliance Manager 1.6*](#)
Explains how to configure the CiscoWorks NCM Satellite functionality.
- [*User Guide for CiscoWorks Network Compliance Manager 1.6*](#)
Explains how to use and configure CiscoWorks NCM 1.6.

Revised Documents

- [*Cisco DCNM Release Notes, Release 5.1*](#)
Explains how to install the Cisco DCNM server and client, lists the new Cisco DCNM features for Release 5.1, and lists the open and resolved caveats for the release.
- [*Cisco DCNM Fundamentals Configuration Guide, Release 5.x*](#)
Explains how to configure the fundamentals on Cisco NX-OS devices using Cisco DCNM.
- [*Cisco DCNM Interfaces Configuration Guide, Release 5.x*](#)
Explains how to configure the interfaces of devices running Cisco NX-OS using Cisco DCNM.
- [*Cisco DCNM Installation and Licensing Guide, Release 5.x*](#)
Explains how to install the Cisco DCNM server in single-server or clustered-server environments and describes the licensing for the Cisco DCNM server.

- [Cisco DCNM System Management Configuration Guide, Release 5.x](#)
Explains how to configure system management features using Cisco DCNM.
- [Cisco DCNM Unicast Configuration Guide, Release 5.x](#)
Explains how to configure unicast routing using Cisco DCNM.
- [Cisco DCNM Virtual Device Context Configuration Guide, Release 5.x](#)
Explains how to use VDCs with Cisco DCNM.
- [Cisco DCNM Web Services API Guide, Release 5.x](#)
Describes the Cisco NX-OS APIs.

Networking

The terms “Unidirectional Path Switched Ring” and “UPSR” may appear in Cisco literature. These terms do not refer to using Cisco ONS 15xxx products in a unidirectional-path-switched-ring configuration.

Instead, these terms, and “Path Protected Mesh Network” and “PPMN,” generally refer to Cisco’s Path Protection feature, which may be used in any topological network configuration. Cisco does not recommend using its Path Protection feature in any particular topological network configuration.

Physical Security and Building Systems

Routers

New Documents

- [Cisco 892F SFP Configuration Example](#)
Describes Cisco 892 Series ISR SFP configuration example.
- [Cisco IOS XR Troubleshooting Guide for the Cisco ASR 9000 Aggregation Services Router](#)
Provides procedures and commands for troubleshooting the Cisco ASR 9000 Aggregation Services Router.
- [Cisco Unified Border Element \(SP Edition\) Configuration Profile Examples](#)
Provides detailed examples of CUBE (SBC) configuration profiles for Telepresence, UNI, and NNI.

Revised Documents

- [Cisco 860, Cisco 880, and Cisco 890 Series Integrated Services Routers Software Configuration Guide](#)
Explains how to configure the SFP port in the Cisco 892 series ISRs.
- [Cisco 860 Series, Cisco 880 Series, and Cisco 890 Series Integrated Services Routers Hardware Installation Guide](#)
Describes the SFP port and explains how to connect an SFP module to the router.

- [*Cisco 7600-ES20 Ethernet Line Card Configuration Guide*](#)

Describes the 7600 ES20 Ethernet Services 20G (ES20) line card that is supported on the Cisco 7600 series routers. This document also explains how to configure the Cisco 7600 ES20 line card and how to troubleshoot the installation.

- [*Cisco 7600 Series Ethernet Services Plus \(ES+\) and Ethernet Services Plus T \(ES+T\) Line Card Configuration Guide*](#)

Describes the Cisco 7600 series Ethernet Services Plus (ES+) and Ethernet Services PlusT (ES+T) line cards that are supported on the Cisco 7600 series routers. This document also explains how to configure line card-specific features for the Cisco 7600 series ES+ and ES+T line card and how to troubleshoot the installation.

- [*Cisco 7600 Series Routers Documentation Roadmap*](#)

Describes the Cisco 7600 series Router documentation and provides links that allow you to access the documentation online.

- [*Cisco 7600 Series Router MIB Specifications Guide*](#)

Describes the Cisco 7600 series Router product implementation of the Simple Network Management Protocol(SNMP).

- [*Cisco 7600 Series Router SIP, SSC, and SPA Software Configuration Guide*](#)

Describes the configuration and troubleshooting of SPA interface processors (SIPs), SPA services cards (SSCs), and shared port adapters (SPAs) that are supported on a Cisco 7600 series router.

- [*Cisco 7600 Series Router Software Configuration Guide Cisco IOS Release 15S*](#)

Describes the configuration information for Cisco IOS Release 15S for Cisco 7600 series routers.

- [*Cisco 7600 Series Routers Troubleshooting Roadmap*](#)

Provides links to the Cisco 7600 series Router troubleshooting documentation.

- [*Cisco ASR 1000 Series Aggregation Services Routers SIP and SPA Hardware Installation Guide*](#)

Provides the hardware installation, troubleshooting, and overview details for the SIPs and SPAs supported on Cisco ASR 1000 Series Routers.

- [*Cisco ASR 1000 Series Aggregation Services Routers SIP and SPA Software Configuration Guide*](#)

Provides the software configuration, troubleshooting details for the SIPs and SPAs supported on Cisco ASR 1000 Series Routers.

- [*Cisco ASR 1000 Series Aggregation Services Routers Software Configuration Guide*](#)

Provides an overview of the software functionality that is specific to Cisco ASR 1000 Series Routers.

- [*Cisco ASR 1000 Series Aggregation Services Routers Operations and Maintenance Guide*](#)

Provides details regarding maintenance, verifying hardware installation, monitoring alarms and control plane, and Upgrading System software on the Cisco ASR 1000 Series Routers.

- [*Guide to Supported Hardware for Cisco 7600 Series Routers with Cisco IOS Release 15S*](#)

Provides the supported hardware information for Cisco 7600 series routers with Cisco IOS Release 15S.

- [*Regulatory Compliance and Safety Information for the Cisco 800 Series and SOHO Series Routers*](#)

Provides international regulatory and safety compliance information for Cisco 800 series routers and Cisco SOHO routers.

- [Software Activation on Cisco Integrated Services Routers and Cisco Integrated Services Routers G2](#)
Explains how to configure Cisco IOS software licenses on Cisco ISRs and ISR G2.

Security

New Documents

- [License and Documentation Guide for Cisco NAC Appliance](#)
Provides important license and documentation information for Cisco NAC Appliance.

Revised Documents

- [Cisco NAC Appliance Service Contract/Licensing Support](#)
Describes Service Contract Support, Ordering Information, Licensing Support, and Cisco NAC Appliance RMA and Licensing guidelines.

Service Exchange

None at this time.

Storage Networking

None at this time.

Switches

New Documents

- [Cisco ME 3800X and ME 3600X Switch Getting Started Guide](#)
Provides basic installation information and Express Setup for the Cisco ME 3800X and ME 3600X switches.
- [Cisco ME 3800X and ME 3600X Switch Command Reference](#)
Describes the commands that have been created or changed for use with the Cisco ME 3800X and ME 3600X switch for Release 12.2(52)EY.
- [Cisco ME 3800X and ME 3600X Switch Hardware Installation Guide](#)
Describes how to install the Cisco ME 3800X and ME 3600X switches.
- [Cisco ME 3800X and ME 3600X Switch Software Configuration Guide](#)
Describes how to configure the software features on the Cisco ME 3800X and ME 3600X switch by using the command-line interface for Release 12.2(52)EY.
- [Cisco ME 3800X and ME 3600X Switch System Message Guide](#)
Describes the system messages you might see on the ME 3800X and ME 3600X switch.

- [*Cisco Nexus 1000V Documentation Roadmap, Release 4.0\(4\) SVI\(3\)*](#)

Describes the Cisco Nexus 1000V documentation that is available online, presented in two lists:

- Sorted by topics and features
- Sorted by document title

- [*Cisco Nexus 1000V Documentation Roadmap, Release 4.0\(4\) SVI\(3a\)*](#)

Describes the Cisco Nexus 1000V documentation that is available online, presented in two lists:

- Sorted by topics and features
- Sorted by document title

- [*Cisco Nexus 1000V Documentation Roadmap, Release 4.0\(4\) SVI\(3b\)*](#)

Describes the Cisco Nexus 1000V documentation that is available online, presented in two lists:

- Sorted by topics and features
- Sorted by document title

- [*Cisco Nexus 5000 Series and Cisco Nexus 2000 Series Release Notes, Release 5.0\(2\)N1\(1\)*](#)

Describes the features, caveats, and limitations for the Cisco Nexus 5000 series switches and the Cisco Nexus 2000 series Fabric Extenders.

- [*Cisco Nexus 5000 Series Command Reference, Release 4.x, Release 5.x*](#)

Describes the commands for the basic system, Ethernet, quality of service, security, Fibre Channel, vPCs, and system management. It also lists the commands for managing a Cisco Nexus 2000 Fabric Extender from the switch.

- [*Cisco Nexus 5000 Series Configuration Limits for Cisco NX-OS Release 5.0\(2\)N1\(1\)*](#)

Describes the Cisco configuration limits for Cisco Nexus 5000 series switches running Cisco NX-OS Release 5.0(2)N1(1).

- [*Cisco Nexus 5000 Series NX-OS Fibre Channel over Ethernet Configuration Guide, Release 5.0\(2\)N1\(1\)*](#)

Explains how to configure FCoE and how to configure FCoE VLANs and virtual interfaces.

- [*Cisco Nexus 5000 Series NX-OS Layer 2 Switching Configuration Guide, Release 5.0\(2\)N1\(1\)*](#)

Explains how to configure Layer 2 features, such as:

- Ethernet interfaces
- VLANs
- PVLANs
- Trunk interfaces
- EtherChannels
- Port channels
- vPCs
- Multiple Spanning Tree, and STP extensions

It also includes configuration information for the MAC address table, IGMP snooping, and traffic storm control.

- [*Cisco Nexus 5000 Series NX-OS Quality of Service Configuration Guide, Release 5.0\(2\)N1\(1\)*](#)
Explains how to configure quality of service features to provide the most desirable flow of traffic in your network. QoS allows you to classify the network traffic, police and prioritize the traffic flow, and provide congestion avoidance.
- [*Cisco Nexus 5000 Series NX-OS Security Configuration Guide, Release 5.0\(2\)N1\(1\)*](#)
Explains how to configure AAA, RADIUS, TACACS+, SSH, Telnet, and access control lists.
- [*Cisco Nexus 5000 Series NX-OS System Management Configuration Guide, Release 5.0\(2\)N1\(1\)*](#)
Explains how to configure system management features such as:
 - Cisco Fabric Services
 - User accounts
 - RBAC, session manager
 - Online diagnostics
 - System message logging
 - Smart call home
 - SNMP
 - RMON
- [*Installation Note for the Cisco ME 3800X and ME 3600X Switch Power Supply and Fan Modules*](#)
Describes how to install the power supply and fan modules for the Cisco ME 3800X and ME 3600X switches.
- [*Regulatory Compliance and Safety Information for the Cisco ME 3800X and ME 3600X Switches*](#)
Provides regulatory compliance and safety information for the Cisco ME 3800X and ME 3600X switch.
- [*Release notes for the Cisco ME 3800X and 3600X Switch, Cisco IOS Release 12.2\(52\)EY*](#)
Provides information about the software for the Cisco ME 3800X and 3600X switch and lists the caveats for Cisco IOS Release 12.2(52)EY.

Revised Documents

- [*Cisco Nexus 2000 Series Hardware Installation Guide*](#)
Explains how to install and connect the Cisco Nexus 2000 series Fabric Extender.
- [*Cisco Nexus 5000 Series and Cisco Nexus 5500 Platform Hardware Installation Guide*](#)
Explains how to install and connect the Cisco Nexus 5000 series switches.
- [*Cisco Nexus 5000 Series MIBs Reference*](#)
Describes the private, or local, Management Information Base (MIB) files for the Cisco Nexus 5000 series switches.
- [*Cisco Nexus 7000 Series FPGA/EPLD Release Notes, Release 5.1*](#)
Explains how to determine whether you need to upgrade EPLD for your Cisco Nexus 7000 series switch.
- [*Cisco Nexus 7000 Series Hardware Installation and Reference Guide*](#)
Explains how to install, replace, and repack the Cisco Nexus 7000 series switch.

- [Cisco Nexus 7000 Series Site Preparation Guide](#)
Explains how to prepare your data center for the installation of a Cisco Nexus 7000 series switch.
- [Cisco NX-OS System Messages Reference](#)
Describes the system messages for the Cisco MDS 9000 family, Cisco Nexus 1000V series, Cisco Nexus 5000 series, and Cisco Nexus 7000 series.
- [Regulatory Compliance and Safety Information for the Cisco Nexus 5000 Series and Cisco Nexus 2000 Series](#)
Provides international agency compliance, safety, and statutory information for the Cisco Nexus 5000 series switches and Cisco Nexus 2000 series Fabric Extenders.

TelePresence

None at this time.

Unified Computing

None at this time.

Universal Gateways and Access Servers

Creating Bookmarks to Cisco.com Pages

When you log into Cisco.com, you can use the My Cisco tool to save links and documents. You can then go to the links from any Cisco.com page. The tool is available on most Cisco.com pages. See the User Guide for help: <http://www.cisco.com/web/help/mycisco.html>.

Cisco Support and Documentation

The Cisco Support and Documentation website provides online resources to download documentation, software, and tools. Use these resources to install and configure the software in addition to troubleshooting and resolving technical issues with Cisco products and technologies.

Access to most tools on the Cisco Support and Documentation website requires a Cisco.com user ID and password.

For more information, go to this URL:

<http://www.cisco.com/cisco/web/support/index.html>

Submitting a Service Request

Open a service request online at:

<http://www.cisco.com/techsupport/servicerequest>

View a list of Cisco worldwide contacts at:

http://www.cisco.com/en/US/support/tsd_cisco_worldwide_contacts.html

Obtaining Additional Information

Information about Cisco products, services, technologies, and networking solutions is available from various online sources.

- Sign up for Cisco e-mail newsletters and other communications at:
<http://www.cisco.com/offer/subscribe>
- Use the Cisco Support website to access online resources, documentation and tools to resolve technical issues with Cisco products. To receive security and technical information about your products, you can subscribe to the Product Alert Tool (accessed from Field Notices), the Cisco Technical Services Newsletter, and Really Simple Syndication (RSS) feeds. You need a Cisco.com user ID and password to access most of the tools on the Cisco Support website.
<http://www.cisco.com/techsupport>
- Order the *Cisco Product Quick Reference Guide*, a portable, easy-to-use reference that provides an overview of Cisco products and solutions for each area of your business. Go to:
<http://www.cisco.com/en/US/prod/qrg/index.html>
- Visit the Cisco Services website for the latest technical, advanced, and remote services to increase the operational reliability of your network. Go to:
<http://www.cisco.com/go/services>

- Visit Cisco Marketplace, the company store, for Cisco collateral, logo merchandise, Cisco Press books, and software at:
<http://www.cisco.com/go/marketplace/>
- Obtain general networking, training, and certification titles from Cisco Press publishers at:
<http://www.ciscopress.com>
- Read the Internet Protocol Journal, a quarterly journal published by Cisco for engineering professionals who design, develop, and operate internets and intranets. Go to:
<http://www.cisco.com/ipj>
- *What's New in Cisco Product Documentation* (this document) is an online publication that provides information about the latest documentation releases for Cisco products. This online publication is updated monthly and organized by product category:
<http://www.cisco.com/en/US/docs/general/whatsnew/whatsnew.html>
- Product Selector Application (PSA) is available for customers and allows them to select their product or technology. To access Cisco technical documentation and resources, go to the following URL:
<http://www.cisco.com/go/techdocs>
- Warranty Finder is now available for finding your warranty information that applies to a specific product or product series/family. To access Cisco Warranty Finder, go to the following URL:
<http://www.cisco-warrantyfinder.com>
- Visit the Cisco Data Center Documentation Twitter Feed for daily updates on Cisco NX-OS features and documentation and provide feedback about the documentation. Go to the following URL:
<http://twitter.com/CiscoDCDocs>
