

# RSP Optimum or Flow Switched Fragmented IP Packets

---

## Description

To improve performance, fragmented IP packets are now optimum or flow switched (depending which switching method is enabled) rather than being process switched by default on Cisco 7500 series routers and on Cisco 7000 series with the 7000 Series Route Switch Processor (RSP7000) and 7000 Series Chassis Interface (RSP7000CI).

## Platforms

This feature is supported on these platforms:

- Cisco 7500 series
- Cisco 7000 series with the RSP7000 and RSP7000CI

## Configuration Task

None

## Configuration Example

None

## Command Reference

None

## What to Do Next

For more information on optimum and flow switching, refer to the “Configuring IP” chapter in the *Network Protocols Configuration Guide, Part 1* and the “IP Commands” chapter in the *Network Protocols Command Reference, Part 1*.

For information on the Cisco 7000 series and Cisco 7500 series routers, refer to the Cisco 7000 series user guides and the Cisco 7500 series installation and configuration guides.
