

Cisco IOS Configuration Fundamentals and Network Management Configuration Guide, Release 12.3

The *Cisco IOS Configuration Fundamentals and Network Management Configuration Guide*, Release 12.3 (known as a “virtual configuration guide”) consists of the Cisco IOS Release 12.2 configuration guide and new-feature documentation for Cisco IOS Releases 12.2 T and 12.3(1).

In some cases, information contained in the new-feature documentation for Cisco IOS Release 12.3(1) and early-deployment Cisco IOS releases numbered 12.2 T augments or supersedes content in the Cisco IOS Release 12.2 configuration guides. New-feature documentation in later 12.2 T releases may replace new-feature documentation in earlier 12.2 T releases.

The following outline includes links to Cisco IOS Release 12.2 chapters and Cisco IOS Release 12.2 T new-feature documentation. Use these documents to configure your Cisco IOS Release 12.3 features. To allow you to identify the latest revisions, this outline indicates the Cisco IOS 12.2 T release in which each new feature was introduced. New features are presented chronologically by subject.
