## Cisco IOS Master Commands List, Release 12.4T

**First Published: February 2008**

**Last Updated: May 2010**

This document contains a list of all commands documented for Cisco IOS Release 12.4T, ordered alphabetically. To search for a command, use the Alphabet Key in the HTML rendition of this document, the Find function in your Web browser, or the Cisco Command Lookup Tool (<https://tools.cisco.com/Support/CLILookup>) where you will be prompted to provide your Cisco.com username and password. To access the documentation for a particular command, click on the command name. This list is intended to be used online only.
