

Security Device Manager Overview

The Cisco Router and Security Device Manager (SDM) is an intuitive, graphical user interface. Cisco SDM allows you to easily configure and monitor advanced IP-based QoS functionality on Cisco routers.

Cisco SDM provides integrated management of Cisco IOS features like the following:

- Wide-area network (WAN) access
- Dynamic routing
- IPSec virtual private networks (VPNs)
- Firewalls
- Intrusion prevention

For more information about Cisco SDM, please visit <http://www.cisco.com/go/sdm>.
