

## Preface

---

This manual describes Cisco netManager and provides instructions for using and administering it.

## Audience

The audience for this document includes:

- Administrators who monitor the status of the device network.
- Users who verify operational status using topology displays, search for phone and device information, and view and act on operational alerts on devices and phones in the network.

### Note

---

Administrators have access to all the features in Cisco netManager. Administrators can assign different access privileges to any user. All other users, by default, have read-only privileges and can only view information.

---

## Conventions

This document uses the following conventions:

Item	Convention
Commands and keywords	<b>boldface</b> font
Variables for which you supply values	<i>italic</i> font
Displayed session and system information	screen font
Information you enter	<b>boldface screen</b> font
Variables you enter	<i>italic screen</i> font
Menu items and button names	<b>boldface</b> font
Selecting a menu item in paragraphs	<b>Option&gt;Network Preferences</b>
Selecting a menu item in tables	Option>Network Preferences

**Note**

Means *reader take note*. Notes contain helpful suggestions or references to material not covered in the publication.

**Caution**

Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.

## Product Documentation

**Note**

We sometimes update the printed and electronic documentation after original publication. Therefore, you should also review the documentation on Cisco.com for any updates.

[Table 1](#) describes the product documentation that is available.
