

Readme for Campus Manager 5.1.1 on Windows

This Readme is for Campus Manager 5.1.1 on Windows. It contains:

- [Description](#)
- [Related Documentation](#)
- [Hardware and Software Requirements](#)
- [Patches Rolled into Campus Manager 5.1.1](#)
- [Supported Devices in Campus Manager 5.1.1](#)
- [Downloading Campus Manager 5.1.1](#)
- [Installing Campus Manager 5.1.1](#)
- [Reinstalling Campus Manager 5.1.1](#)
- [Known Problems in Campus Manager 5.1.1](#)
- [Resolved Problems in Campus Manager 5.1.1](#)
- [Frequently Asked Questions](#)

Description

Campus Manager 5.1.1 is a software update for Campus Manager 5.1. In addition to the devices supported, this package contains fixes to both existing and newly discovered problems.

You should print out and read this document before installing Campus Manager 5.1.1.

**Caution**

Campus Manager 5.1.1 has specific prerequisites. Before installing Campus Manager 5.1.1, see “[Hardware and Software Requirements](#)” section on page 3.

Related Documentation

[Table 1 on page 4](#) lists the devices supported in Campus Manager 5.1.1.

A list of all devices supported in Campus Manager 5.1 is provided in Supported Devices Tables for LMS 3.1 on Cisco.com.

To access this, go to:

http://www.cisco.com/en/US/products/sw/cscowork/ps563/products_device_support_tables_list.html

For a list of fixes to known problems, see “[Resolved Problems in Campus Manager 5.1.1](#)” section on page 18.

A list of all known and resolved problems in Campus Manager 5.1, including the patches containing fixes for known problems rolled into latest SP, is available in Release Notes on Cisco.com.

To access them, go to:

http://www.cisco.com/en/US/products/sw/cscowork/ps563/prod_release_notes_list.html

**Note**

We sometimes update the printed and electronic documentation after original publication. Therefore, we recommend that you also review other documentation for Campus Manager 5.1.1 on Cisco.com for any updates.

Hardware and Software Requirements

Campus Manager 5.1.1 requires that you have installed CiscoWorks Common Services 3.2 and Campus Manager 5.1.

For LMS 3.1 users, CiscoWorks Common Services 3.2 and Campus Manager 5.1 are available as a part of CiscoWorks LMS 3.1.

Hardware and software requirements are the same as those needed for CiscoWorks Common Services 3.2 and Campus Manager 5.1.

A detailed list of requirements and instructions to install CiscoWorks Common Services 3.2 and Campus Manager 5.1, is available on Cisco.com.

For more information, refer the following documents:

- Release Notes for Campus Manager 5.1
- Installing and Getting Started With CiscoWorks LAN Management Solution 3.1

To access the documents, go to:

http://www.cisco.com/en/US/products/sw/cscowork/ps563/prod_release_notes_list.html

CM 5.1.1 Upgrade Path

Use the table below to verify the upgrade path to Campus Manager 5.1.1:

If you have installed...	You must install...
CM5.0 or CM5.0.1	LMS 3.1+CM5.1.1
LMS 3.0 December 2007 Update or CM 5.0.3	LMS 3.1+CM5.1.1
LMS 3.1	CM 5.1.1

Patches Rolled into Campus Manager 5.1.1

There are no patches, containing fixes to bugs, that have been rolled into Campus Manager 5.1.1.

Supported Devices in Campus Manager 5.1.1

Table 1 lists the devices supported in Campus Manager 5.1.1.

For a list of all devices supported in Campus Manager 5.1, see the Supported Devices Table for LMS 3.1 on Cisco.com (see the [“Related Documentation” section on page 2](#)).

2. The device Cisco 7845H Media Convergence Server has been tested on the softwares Cisco Unified Communications Manager Version 6.1.1 and Version 7.0.0.

Downloading Campus Manager 5.1.1

You can download the Campus Manager 5.1.1 installer file, cwcm5_1_1_win.zip, by either:

- [Downloading From Cisco.com](#)

Or

- [Downloading From Software Center](#)

Downloading From Cisco.com

You can download the updates:

- From the Software Downloads page
From the Cisco.com home page, Select **Products & Solutions > Network Management > All Network Management Products > CiscoWorks Campus Manager > Download Software** to access the Software Downloads page.

Or

- From <http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-campus>

To download the file from Cisco.com:

-
- Step 1** Locate the package file cwcm5_1_1_win.zip.
- Step 2** Save the file to a temporary working area of your server.
-

Downloading From Software Center

To download the file from Software Center:

-
- Step 1** Go to the CiscoWorks homepage and select **Common Services > Software Center > Software Update**. The Software Updates page appears.
- Step 2** Check the Campus manager check box in the Products Installed table, and click **Select Updates**. The CCO and Proxy Server Credentials page appears.
You are prompted to enter your Cisco.com User Name and Password. If you have configured proxy settings, you are prompted to enter the Proxy Server User credentials.
You can configure your Proxy Server User credentials from the Proxy Server Setup page.
To access the Proxy Server Setup page, go to the CiscoWorks Homepage and select **Common Services > Server > Security > Cisco.com Connection Management > Proxy Server Setup**.
The Proxy Server Setup page appears. Enter the required information in the page to configure your Proxy Server settings.
- Step 3** Enter the required credentials, and click **Next**.
The Available Images page appears with packages for Windows (cwcm5_1_1_win.zip).
- Step 4** Select cwcm5_1_1_win.zip and click **Next**.
The Destination Location page appears.
- Step 5** Enter the location or browse to the location using the Browse button.
- Step 6** Click **Next**.
The Summary page appears. The Summary window displays a summary of your inputs.
- Step 7** Click **Finish** to confirm the download operations.
The package file is downloaded to the directory that you selected, in the folder cm.
-

Installing Campus Manager 5.1.1

Before you install Campus Manager 5.1.1, make sure your installation environment meets the requirements described in “[Hardware and Software Requirements](#)” section on page 3.

To install Campus Manager 5.1.1:

-
- Step 1** Log into the machine as local administrator.
- Step 2** Navigate to the directory that contains the zip file that you have downloaded.
- Step 3** Unzip the package file cwcm5_1_1_win.zip to your temporary directory.
- Step 4** Navigate to the temporary directory where you have extracted the files packaged in the installer.
- Step 5** Double-click the file, cwcm5_1_1_win.exe, to begin installation.
- A prompt appears:
- ```
This will install Campus Manager 5.1.1. Do you want to proceed?
```
- Step 6** Click **Yes** to continue or click **No** to exit the setup.
- If you have not installed Common Services 3.2, this message appears:
- ```
Install Common Services 3.2 before installing Campus Manager 5.1.1.
```
- The installation terminates when you click **OK**.
- Common Services 3.2 is available as a part of CiscoWorks LMS 3.1.
- If you have not installed Campus Manager 5.1, this message appears:
- ```
Install Campus Manager 5.1 before installing Campus Manager 5.1.1.
```
- The installation terminates when you click **OK**.
- Campus Manager 5.1 is available as a part of CiscoWorks LMS 3.1.
- A detailed list of instructions to install CiscoWorks Common Services 3.2, and Campus Manager 5.1 (a part of CiscoWorks LAN Management Solution 3.1) is available on Cisco.com.
- To access this, go to:
- [http://www.cisco.com/en/US/products/sw/cscowork/ps2425/prod\\_installation\\_guides\\_list.html](http://www.cisco.com/en/US/products/sw/cscowork/ps2425/prod_installation_guides_list.html)
- After installing Common Services 3.2, and Campus Manager 5.1, resume from [Step 5](#).
- Step 7** Click **Next** in the Welcome Screen to continue your installation.
- The Software License Agreement dialog box appears.
- Step 8** You should click either:
- **Accept** to continue
- or
- **Do Not Accept** to exit the setup
- The System Requirements window appears and the installation checks whether the system requirements are met.
- If there is not enough disk space to install Campus Manager 5.1.1, the installation displays an error message and stops.
  - If the minimum requirements are not met, the installation displays a warning message and continues the setup.
- Step 9** Click **Next**.

The Daemons Restart Options dialog box appears with the following message:

If no other CiscoWorks application installations are pending, you can choose to start CiscoWorks Daemons.

Do you want to restart CiscoWorks Daemons at the end of this installation?

If you want to start CiscoWorks daemons, click Yes.

If you do not want to start CiscoWorks daemons, click No.

**Step 10** You should click either:

- **Yes** to restart CiscoWorks daemons

or

- **No** if you have any other installations pending

A Summary dialog box displaying the current settings for installation appears.

**Step 11** Click **Install**.

The Setup Complete dialog box appears with the message:

Setup is complete. Click Finish to start CiscoWorks.

**Step 12** Click **Finish** to complete and quit the installation.

To ensure that the installation is successful, go to **Common Services > Software Center > Software Update**. Click **Campus Manager** and ensure that the Patches Installed table displays Campus Manager 5.1.1.

## Reinstalling Campus Manager 5.1.1

To reinstall Campus Manager 5.1.1, follow the instructions in the [“Installing Campus Manager 5.1.1” section on page 16](#).

## Known Problems in Campus Manager 5.1.1

Known problems are unexpected behaviors or defects in Campus Manager software releases.

To obtain more information about known problems, access the Cisco Software Bug Toolkit at <http://www.cisco.com/cgi-bin/Support/Bugtool/home.pl>. (You will be prompted to log into Cisco.com.)

For a list of known problems in Campus Manager 5.1, see Release Notes for CiscoWorks Campus Manager 5.1 available on Cisco.com (see [“Related Documentation” section on page 2](#)).

**Table 2** *Known Problems in Campus Manager 5.1.1*

| Bug ID     | Summary                                                                                                                                                                                                                  |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CSCsr38459 | Single virtual interface is displayed twice in the port attributes list. It happens in case of virtual interfaces. For Cat2970 and IE 3000 category devices, single port is displayed twice in the port attributes list. |

# Resolved Problems in Campus Manager 5.1.1

Table 3 lists the resolved problems in Campus Manager 5.1.1.

**Table 3** *Resolved Problems in Campus Manager 5.1.1*

| Bug ID     | Summary                                                                                                                                                                                                                                                                                               |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CSCsq74485 | Sorting by Number in Port Attribute report is not working. The Port Number sorting is not working as expected and behaves like string sorting.                                                                                                                                                        |
| CSCsq56548 | End hosts on Access Points are no longer acquired by default. Since there was a huge POLA violation in Campus Manager 5.0, and since WLSE integration was introduced, User Tracking no longer acquires end hosts on Access Points by default.                                                         |
| CSCsq72800 | User Tracking no longer acquires End Hosts on AccessPoints. This is a companion bug to CSCsq56548. Setting APRunCollection to true in ut.properties does not help. End host acquisition does not work since the VmpsAdminSMFBridgeTable code is not updated for Campus 5.0.                           |
| CSCsr48379 | Online Help should mention that Wireless Report will show only WLSE devices. User Tracking Wireless Report is showing only reports about the WLSE integration. This information must be documented.                                                                                                   |
| CSCsj72047 | Groups created in Common Services are not available in Campus Manager. After restarting the Daemon Manager, the User Defined Groups in Common Services are not available from Campus Manager. Membership details for the groups show empty results.                                                   |
| CSCsq08600 | Windows usernames are not displayed in User Tracking (UT). Depending on when UT acquisition is done and when an user actually connects to the network, UT may not properly display Windows usernames.                                                                                                 |
| CSCsq79950 | Campus Manager does not support VLANs greater than 1024 on 2950 series switches. It occurs for all 2950 series switches which are configured for extended VLANs (those with IDs greater than 1024). It leads to false trunk VLAN mismatch discrepancies and incomplete VLAN topology Data Collection. |
| CSCsq80237 | User Tracking Export does not quote Port Name field. This becomes a problem when the Port Name field contain an embedded comma.                                                                                                                                                                       |
| CSCsq26330 | UTLite does not work with hostnames. If the CiscoWorks server is specified by a hostname, UTLite33.exe does not send any update.                                                                                                                                                                      |
| CSCsr25957 | In LMS 3.0 VTP Domain return as NULL. In LMS3.0, User Tracking is unable to find the VTP domain object using the VTP name. As a result, VLAN ID cannot be used for comparison. The available VLAN name is different and this results in CAM/ARP mismatch.                                             |
| CSCsr11007 | Scheduled User Tracking Report fails when you launch Report Generator under Reports in Campus User Tracking. Select an Application and schedule a report. It fails.                                                                                                                                   |
| CSCsr09442 | User Tracking reports cannot be sorted on IP Address or Subnet columns. Other columns sort correctly. When you click on the IP Address or Subnet columns, the browser spins indefinitely and an exception is seen in the stdout.log                                                                   |
| CSCsr89218 | SSH is not launching from TOPO. SSH flow code has been removed in this release due to jacobr changes.                                                                                                                                                                                                 |

**Table 3**      **Resolved Problems in Campus Manager 5.1.1**

| <b>Bug ID</b> | <b>Summary</b>                                                                                                                                                                                                                                                                                                                                                                                                                             |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CSCsu39631    | Link to DFM Poller Settings page must be provided in DFM Alert Settings. In Campus Manager OLH and User Guide, link to DFM Poller Settings page must be provided in DFM Alert Settings page.                                                                                                                                                                                                                                               |
| CSCsr48028    | MACs that are not included in the Acceptable MAC list are not considered as rogue. In Rogue MAC detection feature, add some MAC and OUI to an acceptable MAC list. Make sure that Rogue MAC / OUI list is not populated with any values. On running UT, no rogue MAC is detected. The expected behavior is, only when an acceptable MAC list is populated, MAC that is not specified in Acceptable MAC list should be considered as rogue. |

# Frequently Asked Questions

- [Q.How will I know which version of Campus Manager I have installed?](#)
- [Q.I do not want support for all the devices that you have supported in Campus Manager 5.1.1. Can I select only the devices I want?](#)
- [Q.Where can I find device support for CiscoView, Device Fault Manager, or Resource Manager Essentials?](#)
- [Q.Where can I find information on the supported devices for Campus Manager 5.1.1?](#)

**Q.** How will I know which version of Campus Manager I have installed?

**A.** To check the version of Campus Manager installed on your system, from the CiscoWorks desktop, select **Common Services > Software Center > Software Update > Campus Manager**.

The Patches Installed table displays the installed version of the applications.

| If Patches Installed Table Displays | Campus Manager Version Installed is... |
|-------------------------------------|----------------------------------------|
| Campus Manager - 5.1.1              | 5.1.1                                  |

**Q.** I do not want support for all the devices that you have supported in Campus Manager 5.1.1. Can I select only the devices I want?

**A.** No. The present installation framework does not support this feature. Even if you do not have all the supported devices, installing Campus Manager 5.1.1 will not adversely affect your network.

**Q.** Where can I find device support for CiscoView, Device Fault Manager, or Resource Manager Essentials?

**A.** The device support packages are available at the following locations:

| Application                 | Location is...                                                                                                                            |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| CiscoView                   | <a href="http://www.cisco.com/cgi-bin/Software/CiscoView/cvplanner.cgi">http://www.cisco.com/cgi-bin/Software/CiscoView/cvplanner.cgi</a> |
| Device Fault Manager        | <a href="http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-dfm">http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-dfm</a>                 |
| Resource Manager Essentials | <a href="http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-rme">http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-rme</a>                 |

**Q.** Where can I find information on the supported devices for Campus Manager 5.1.1?

**A.** You can find the latest information on supported devices for Campus Manager 5.1.1, see Supported Devices Tables for LMS 3.1 on Cisco.com.

To access this, either:

- Go to the Cisco.com home page and select **Products & Solutions > Network Management > All Network Management Products > CiscoWorks Campus Manager**.
- From the Technical Documentation & Tools section, select **General Information > Compatibilty Information > Supported Devices Table for LMS 3.1**

Or

- Go to
- [http://www.cisco.com/en/US/products/sw/cscowork/ps2425/products\\_device\\_support\\_tables\\_list.html](http://www.cisco.com/en/US/products/sw/cscowork/ps2425/products_device_support_tables_list.html)

**Note**

---

The Supported Devices Table for LMS 3.1 contains the information on device support for Campus Manager 5.1.1.
