Description

LMS 2.5 December 2005 Update is a bundle update that contains patches to more than one component of the LMS 2.5 bundle.

It is provided as a single installable and contains updates for the following applications:

- CiscoWorks Common Services 3.0 (includes CiscoView 6.1)
- Resource Manager Essentials 4.0
- Campus Manager 4.0
- Device Fault Manager 2.0

There is no update for Internetwork Performance Monitor 2.6.

New Features in LMS 2.5 December 2005 Update

CiscoWorks LMS 2.5 December 2005 Update provides new support for the following:

- Windows Server 2003 Standard and Enterprise Editions with Service Pack 1 (client and server)
- Windows XP with Service Pack 2 (client)
- Netscape Navigator 7.2 (Windows)
- Mozilla 1.7 and 1.7.5 (Solaris and Windows)
- Java Plug-in 1.4.2_08

CiscoWorks Common Services 3.0.3 (Common Services 3.0 Service Pack 3)

CS 3.0.1 (CS 3.0 SP1) and CS 3.0.2 (CS 3.0 SP2) are the incremental releases over CS 3.0. These releases have been rolled into CS 3.0.3 (CS SP3).

The following new features and enhancements in CS 3.0.1 and CS 3.0.2 are rolled into CS 3.0.3:

- AcsRegCli.pl command line script allows you to register individual applications with ACS without affecting the registration status of other applications.

- Audit log provides information on:
 - CiscoWorks Local user addition
 - CiscoWorks Local user modification
 - CiscoWorks Local user deletion
- Conflict resolution option in **decrc11** overwrites Device and Credential Repository (DCR) data from import source.
- Enhancements in Device and Credential Repository (DCR):
 - Support for HTTP related credentials and attributes
 - Support for CNS Configuration Engine and CNS Managed devices
- Enhancements in Software Center:
 - Prompt for Cisco.com credentials while selecting, scheduling, and downloading software and device updates.
 - Prompt for Proxy credentials while selecting, scheduling, and downloading software and device updates if you have configured Proxy settings
 - Software Center CLI allows you to display the list of dependent packages for a specified PSU package.
- Support for Cisco Secure ACS 3.3.3 (appliance and software).
- Support for MDF 1.6. (The MDF package 1.6 is a cumulative package that includes the new device types added after the release of CiscoWorks Common Services 3.0. This package contains new device types, new device type definitions, new device icons, and solutions to some problems in earlier MDF packages.)

See *User Guide for CiscoWorks Common Services 3.0.3* for further details on these new features:

http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/cw2000_d/cs303/usrguide/index.htm

For Resolved Bugs in CS 3.0.3, see *Release Notes for CiscoWorks Common Services 3.0.3 (Includes CiscoView) on Windows*:

http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/cw2000_d/cs303/index.htm

CiscoView 6.1.2

CiscoView 6.1.2 supports Mini-RMON management:

- Monitor all 4 mini-RMON groups in RMON-compliant devices.
- Provide templates for MIB variables that are monitored frequently. These templates contain pre-set thresholds that you can change. You can also create templates for other MIB variables.
- Generate alarms when the threshold exceeds.
- Display the events and/or forward them to a management console
- Co-relate the logged events to the threshold template

See *Using CiscoView 6.1.2* for further details on these new features:

http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/cw2000_d/cs303/cv_ug/index.htm

Resource Manager Essentials 4.0.3 (RME 4.0 Service Pack 3)

RME 4.0.1 (RME 4.0 SP1) and RME 4.0.2 (RME 4.0 SP2) are the incremental releases over RME 4.0. These releases have been rolled into RME 4.0.3 (RME 4.0 SP 3).

The following new features in RME 4.0.1 and RME 4.0.2 are rolled into RME 4.0.3:

- NetShow—Enables you to define command sets with show commands and run these commands on devices.
- Contract Connection—Enables you to verify the service contracts for your Cisco IOS devices. You can also view the contract details of those devices.
- SmartCase—SmartCase provides the Cisco.com link to raise TAC cases.
- RME 4.0 SP1 supports Secure Shell Version 2 (SSHv2).

See *User Guide for Resource Manager Essentials 4.0.3* for further details on these new features:

http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/cw2000e/e_4_x/4_0_3/u_guide/index.htm

See *Supported Device Table for Resource Manager Essentials 4.0.3* for new device support:

http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/cw2000e/e_4_x/4_0_3/sdt/index.htm

For resolved bugs in RME 4.0.3, see *Release Notes for Resource Manager Essentials 4.0.3 on Windows*:

http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/cw2000e/e_4_x/4_0_3/index.htm

Campus Manager 4.0.3 (CM 4.0 Service Pack 3)

CM 4.0.1 (CM 4.0 SP1) and CM 4.0.2 (CM 4.0 SP2) are the incremental releases over CM 4.0. These releases have been rolled into CM 4.0.3 (CM 4.0 SP 3).

There are no new features supported in CM 4.0.3. However, the new device support in CM 4.0.1 and CM 4.0.2 releases are rolled into CM 4.0.3.

For new device support, see *Supported Devices Table for Campus Manager 4.0.3*:

http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/camp_mgr/camp_4x/cmgr_403/cm40sdt.htm

For Resolved Bugs in CM 4.0.3, see *Release Notes for Campus Manager 4.0.3 on Windows*:

http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/camp_mgr/camp_4x/cmgr_403/index.htm

Device Fault Manager 2.0.3 (DFM 2.0 Service Pack 3)

DFM 2.0.1 (DFM 2.0 SP1) and DFM 2.0.2 (DFM 2.0 SP2) are the incremental releases over DFM 2.0. These releases have been rolled into DFM 2.0.3 (DFM 2.0 SP 3).

The following new features in DFM 2.0.1 and DFM 2.0.2 are rolled into DFM 2.0.3:

- Support for new CISCO-DEVICE-EXCEPTION-REPORTING-MIB pass-through trap, `cderMonitoredExceptionEvent`.

See *User Guide for Device Fault Manager 2.0.3* for further details on these new features:

<http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/dfm/dfm203/ug/index.htm>

- New device support, see *Supported Device Table for Device Fault Manager 2.0.3*:

<http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/dfm/dfm203/index.htm>

For Resolved Bugs in DFM 2.0.3, see *Release Notes for Device Fault Manager 2.0.3 on Windows*:

<http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/dfm/dfm203/index.htm>

Hardware and Software Requirements

For the LMS 2.5 December 2005 Update hardware and software requirements see Quick Start Guide for LAN Management Solution 2.5.

This document is available at this location:

http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/cw2000_b/lms/lms25/index.htm

Prerequisites for CiscoWorks LMS 2.5 December 2005 Update

Install CiscoWorks Common Services 3.0 and the LMS 2.5 applications to be updated before installing CiscoWorks LMS 2.5 December 2005 Update.

For details, see the Quick Start Guide for Quick Start Guide for LAN Management Solution 2.5:

http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/cw2000_b/lms/lms25/lms25qsg.htm

Please note:

- If you *do not* want to install one or more of the LMS 2.5 applications at present but plan to install them later, you must reinstall CiscoWorks LMS 2.5 December 2005 Update after you install the missing applications.

For example, if you install RME 4.0 after installing LMS 2.5 December 2005 Update, after installing RME 4.0, you must reinstall LMS 2.5 December 2005 Update.

See [Installing CiscoWorks LMS 2.5 December 2005 Update for Missing LMS 2.5 Applications](#), page 15.

- You *cannot* select individual application updates. This update automatically detects the installed LMS 2.5 applications and installs the required updates for that specific application.
- You *cannot* uninstall CiscoWorks LMS 2.5 December 2005 Update. We recommend that you take a backup before installing CiscoWorks LMS 2.5 December 2005 Update on Windows.
- If you have configured DCR Master-Slave setup, you must install this update in all of the CiscoWorks servers.

The Common Services Service Pack versions must be same in all of the DCR Master-Slave setup machines.

- If you have configured Remote Syslog Collector (RSC) on a different server, you *must* upgrade RSC to RSC 4.0.1. You cannot use the RSC 4.0 that was provided with RME 4.0 for RME 4.0.3.

To upgrade RSC, you must install this update on the machine that contains RSC by following the same LMS 2.5 December 2005 Update install instruction. See [Installing CiscoWorks LMS 2.5 December 2005 Update on Windows, page 9](#).

- You must have a minimum free space of 350 MB on your hard disk to install this update.

Downloading CiscoWorks LMS 2.5 December 2005 Update on Windows

You can download LMS 2.5 December 2005 Update using either of these options:

- [Single Large File](#)
- [Multiple Small Files](#)

These files are available on the LMS Software Download page:

<http://www.cisco.com/kobayashi/sw-center/cw2000/lan-planner.shtml>

You must be a registered Cisco.com user to download this update.

Single Large File

A single LMS 2.5 December 2005 Update file is available if you want to download one large file.

The Single Large File option has these files:

- lms25_dec2005_update_win.zip
- lms25_dec2005_update_win_readme.pdf

Multiple Small Files

The Single Large LMS 2.5 December 2005 Update file is split into multiple small files if you want to download small files.

The Multiple Small Files option has these files:

- cksum.exe
- unzip.exe
- lms25_dec05_update_win_installer.bat
- lms25_dec05_update_win_1of3.zip
- lms25_dec05_update_win_2of3.zip
- lms25_dec05_update_win_3of3.zip
- lms25_dec05_update_win_readme.pdf

Important Download Notes for LMS 2.5 December 2005 Update

This section contains important information that you should read before you begin downloading:

- The Single Large File and Multiple Small Files of this update are *not* visible through the CiscoWorks Software Updates page (**Common Services > Software Center > Software Update**).
- You must *not* change the filename of the update files.

- You must download all of the Multiple Small Files in the same location.
- You can download Multiple Small Files in any order.
- You must have minimum free space of 250 MB in your hard disk to download this update.

Installing CiscoWorks LMS 2.5 December 2005 Update on Windows

To install this update, login as local administrator or user with administrator privileges on the system on which you installed the LMS 2.5 applications.

LMS 2.5 December 2005 Update is installed in the same directory as LMS 2.5. By default, it is *System_Drive*\Program Files\CSCOPx. Where, *System_Drive* is the Windows operating system installed directory.

Note

If you want to migrate (local) data from earlier versions of Common Services, RME, Campus Manager, and IPM onto a fresh (remote) installation of LMS 2.5.1, see the instructions provided in the Data Migration Guide for LAN Management Solution 2.5.1 at this URL:

http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/cw2000_b1ms/lms251/index.htm

If you want to migrate (local) DFM 1.2.x data onto a fresh (remote) installation of DFM 2.0.3, you must use the migration script provided in the DFM Upgrade Kit (for LMS 2.5.1) on Cisco.com. Log in to Cisco.com and point your browser to <http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-dfm>. Refer to the Readmes on the download site for installation instructions.

It takes approximately 2 hours and 30 minutes to install the complete update for Common Services, RME, Campus Manager, and DFM.

The following section describes the procedure for:

- [Installing the Single Large File Update](#)
- [Installing the Multiple Small Files Update](#)
- [Installing CiscoWorks LMS 2.5 December 2005 Update for Missing LMS 2.5 Applications](#)

Installing the Single Large File Update

To install the Single Large File update:

-
- Step 1** Navigate to the location on your system, where you downloaded the LMS 2.5 December 2005 Update files.
 - Step 2** Unzip the `lms25_dec2005_update_win.zip` file.
The files are extracted under the `lms25_dec2005_update_win` folder.
 - Step 3** Navigate to the `lms25_dec2005_update_win` folder.
 - Step 4** Double click `CiscoWorks_LMS_2.5_Dec_2005_Update.exe`.
The CiscoWorks LMS 2.5 Dec 2005 Update window appears.
 - Step 5** Click **Yes** to continue.
The Welcome screen appears.
 - Step 6** Click **Next** to continue.
The Software License Agreement window appears. You must accept this agreement to install CiscoWorks LMS 2.5 December 2005 Update.
 - Step 7** Click **Accept** to continue.
The Install Update window appears with the updates that will be installed.
 - Step 8** Click **Next**.
The installation program checks dependencies and system requirements. The System Requirements window appears.
The System Requirements window displays the system requirements, available space in the disk drive, available memory and Swap in megabytes, and CPU speed in megahertz.
 - Step 9** Click **Next**.
The Summary window appears with the updates that will be installed and the settings for the installation.

Step 10 Click **Next**.

The Setup screen appears, displaying installation progress while files are copied and applications are configured.

The following message appears only if you have installed the update for RME:

```
To ensure that you retain the latest device support, please install
the latest Device Packages from CCO
@http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-rme
Please refer to the Installation and Setup Guide for details.
```

Step 11 Click **OK**.

The following message appears only if you have installed the update for Campus Manager:

```
To ensure that you retain the latest device support and bug fixes,
please install
the latest Service Pack (SP) for Campus Manager 4.0.3
You can download the latest SP from
http://www.cisco.com/cgi-bin/tableb
uild.pl/cw2000-campus.
Please refer to the Installation and Setup Guide for details.
```

```
User Tracking Utility 1.0 is not compatible with Campus Manager 4.0.3
User Tracking Utility 1.1.1 is available for Campus Manager 4.0.3
You can download the latest UTU from
http://www.cisco.com/cgi-bin/table
build.pl/cw2000-campus-crypto.
```

Step 12 Click **OK**.

The following message appears:

```
If you plan to install any of the LMS 2.5 applications later, you must
reinstall CiscoWorks LMS 2.5 Dec 2005 Update after installing these
applications.
```

Step 13 Click **OK**.

The Restart dialog box appears after installation completes.

Note You need to restart your machine only if you have installed update for DFM application.

Step 14 Select **Yes, I want to restart my computer now.**

Step 15 Click **Finish.**

Installing the Multiple Small Files Update

To install the Multiple Small Files update:

Step 1 Navigate to the location on your system, where you downloaded the LMS 2.5 December 2005 Update files.

Step 2 Run the Windows batch file at the command prompt.

```
lms25_dec05_update_win_installer.bat
```

- If you have *not* downloaded all of the Multiple Small Files, an error message appears:

```
ERROR: You have not downloaded all the above files  
ERROR: Please download all the above files and  
ERROR: then run this script
```

Download all of the Multiple Small Files, see [Multiple Small Files](#) for list of files.

- If you have downloaded all of the Multiple Small Files, a message appears:

```
INFO: You have downloaded all the necessary files  
INFO: creating the zip file from the downloaded files
```

A pop-up appears.

Click **Yes** to continue with the installation.

The update installation starts by displaying the Welcome screen.

Step 3 Click **Next** to continue.

The Software License Agreement window appears. You must accept this agreement to install CiscoWorks LMS 2.5 December 2005 Update.

Step 4 Click **Accept** to continue.

The Install Update window appears with the updates that will be installed.

Step 5 Click **Next**.

The installation program checks dependencies and system requirements. The System Requirements window appears.

The System Requirements window displays the system requirements, available space in the disk drive, available memory and Swap in megabytes, and CPU speed in megahertz.

Step 6 Click **Next**.

The Summary window appears with the updates that will be installed and the settings for the installation.

Step 7 Click **Next**.

The Setup screen appears, displaying installation progress while files are copied and applications are configured.

The following message appears only if you have installed the update for RME:

```
To ensure that you retain the latest device support, please install
the latest Device Packages from CCO
@http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-rme
Please refer to the Installation and Setup Guide for details.
```

Step 8 Click **OK**.

The following message appears only if you have installed the update for Campus Manager:

```
To ensure that you retain the latest device support and bug fixes,
please install
the latest Service Pack (SP) for Campus Manager 4.0.3
You can download the latest SP from
http://www.cisco.com/cgi-bin/tableb
uild.pl/cw2000-campus.
Please refer to the Installation and Setup Guide for details.
```

```
User Tracking Utility 1.0 is not compatible with Campus Manager 4.0.3
User Tracking Utility 1.1.1 is available for Campus Manager 4.0.3
You can download the latest UTU from
http://www.cisco.com/cgi-bin/table
build.pl/cw2000-campus-crypto.
```

Step 9 Click **OK**.

The following message appears:

If you plan to install any of the LMS 2.5 applications later, you must reinstall CiscoWorks LMS 2.5 Dec 2005 Update after installing these applications.

Step 10 Click **OK**.

The Restart dialog box appears after installation completes.

Note You need to restart your machine only if you have installed update for DFM application.

Step 11 Select **Yes, I want to restart my computer now**.

Step 12 Click **Finish**.

Verifying the LMS 2.5 December 2005 Update Installation

After you install the CiscoWorks LMS 2.5 December 2005 Update on Windows, you must verify the installation. To do this:

Step 1 Launch CiscoWorks.

`http://server_name:port_number`

where *server_name* is the name of the CiscoWorks Server and *port_number* is the TCP port used by the CiscoWorks Server. In normal mode (HTTP), the default TCP port for CiscoWorks Server is 1741. When SSL is enabled (HTTPS), the default TCP port for CiscoWorks Server is 443.

Step 2 Select **Common Services > Software Center > Software Update**.

The Software Updates window appears.

The following entries appear in the Products Installed table for each application that you have installed:

Product Name	Version With Patch Level
CiscoWorks Common Services	3.0.3
Campus Manager	4.0.3
CiscoView	6.1.2
Device Fault Manager	2.0.3
Resource Manager Essentials	4.0.3

If you have installed RSC on a different machine, the following entries appear in the Product Installed table:

Product Name	Version With Patch Level
CiscoWorks Common Services	3.0.3
Remote Syslog Collector	4.0.1

Installing CiscoWorks LMS 2.5 December 2005 Update for Missing LMS 2.5 Applications

If you install any of the LMS 2.5 applications after installing LMS 2.5 December 2005 Update, you must reinstall LMS 2.5 December 2005 Update once again.

To install this update, login as local administrator or user with administrator privileges on the system on which you installed the LMS 2.5 applications.

The following sections describe the procedure for:

- [Installing Single Large File for Missing LMS 2.5 Applications](#)
- [Installing Multiple Small Files for Missing LMS 2.5 Applications](#)

Installing Single Large File for Missing LMS 2.5 Applications

To install the Single Large File update for missing LMS 2.5 applications:

-
- Step 1** Navigate to the location on your system, where you downloaded the LMS 2.5 December 2005 Update files.
- Step 2** Unzip the `lms25_dec2005_update_win.zip` file.
The files are extracted under the `lms25_dec2005_update_win` folder.
- Step 3** Navigate to the `lms25_dec2005_update_win` folder.
- Step 4** Double-click `CiscoWorks_LMS_2.5_Dec_2005_Update.exe`.
The CiscoWorks LMS 2.5 Dec 2005 Update window appears.
- Step 5** Click **Yes** to continue.
The Welcome screen appears.
- Step 6** Click **Next** to continue.
The Software License Agreement window appears. You must accept this agreement to install CiscoWorks LMS 2.5 December 2005 Update.
- Step 7** Click **Accept** to continue.
The Install Update window appears with the updates that will be installed and the updates that are already installed.
You can select either of these options:
- Install new updates only—To install only the new updates.
 - Install/reinstall all updates—To install the new updates and also reinstall the updates for the already updated applications.
- Step 8** Select one of these options and click **Next**.
The installation program checks dependencies and system requirements. The System Requirements window appears.
The System Requirements window displays the system requirements, available space in the disk drive, available memory and Swap in megabytes, and CPU speed in megahertz.
- Step 9** Click **Next**.
The Summary window appears with the updates that will be installed and the settings for the installation.

Step 10 Click **Next**.

The Setup screen appears, displaying installation progress while files are copied and applications are configured.

The following message appears only if you have installed the update for RME:

To ensure that you retain the latest device support, please install the latest Device Packages from CCO
@<http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-rme>
Please refer to the Installation and Setup Guide for details.

Step 11 Click **OK**.

The following message appears only if you have installed the update for Campus Manager:

To ensure that you retain the latest device support and bug fixes, please install the latest Service Pack (SP) for Campus Manager 4.0.3
You can download the latest SP from
<http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-campus>.
Please refer to the Installation and Setup Guide for details.

User Tracking Utility 1.0 is not compatible with Campus Manager 4.0.3
User Tracking Utility 1.1.1 is available for Campus Manager 4.0.3
You can download the latest UTU from
<http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-campus-crypto>.

Step 12 Click **OK**.

The following message appears:

If you plan to install any of the LMS 2.5 applications later, you must reinstall CiscoWorks LMS 2.5 Dec 2005 Update after installing these applications.

Step 13 Click **OK**.

The Restart dialog box appears after installation completes.

Note You need to restart your machine only if you have installed update for DFM application.

Step 14 Select **Yes, I want to restart my computer now.**

Step 15 Click **Finish.**

Installing Multiple Small Files for Missing LMS 2.5 Applications

To install Multiple Small Files update for missing LMS 2.5 applications:

Step 1 Navigate to the location on your system, where you downloaded the LMS 2.5 December 2005 Update files.

Step 2 Run the Windows batch file at the command prompt.

```
lms25_dec05_update_win_installer.bat
```

- If you have *not* downloaded all of the Multiple Small Files, an error message appears:

```
ERROR: You have not downloaded all the above files  
ERROR: Please download all the above files and  
ERROR: then run this script
```

Download all of the Multiple Small Files, see [Multiple Small Files](#) for list of files.

- If you have downloaded all of the Multiple Small Files, a message appears:

```
INFO: You have downloaded all the necessary files  
INFO: creating the zip file from the downloaded files
```

A pop-up appears.

Click **Yes** to continue with the installation.

The update installation starts by displaying the Welcome screen.

Step 3 Click **Next** to continue.

The Software License Agreement window appears. You must accept this agreement to install CiscoWorks LMS 2.5 December 2005 Update.

Step 4 Click **Accept** to continue.

The Install Update window appears with the updates that will be installed and the updates that are already installed.

You can select either of these options:

- Install new updates only—To install only the new updates.
- Install/reinstall all updates—To install the new updates and also reinstall the updates for the already updated applications.

Step 5 Select one of these options and click **Next**.

The installation program checks dependencies and system requirements. The System Requirements window appears.

The System Requirements window displays the system requirements, available space in the disk drive, available memory and Swap in megabytes, and CPU speed in megahertz.

Step 6 Click **Next**.

The Summary window appears with the updates that will be installed and the settings for the installation.

Step 7 Click **Next**.

The Setup screen appears, displaying installation progress while files are copied and applications are configured.

The following message appears only if you have installed the update for RME:

```
To ensure that you retain the latest device support, please install
the latest Device Packages from CCO
@http://www.cisco.com/cgi-bin/tablebuild.pl/cw2000-rme
Please refer to the Installation and Setup Guide for details.
```

Step 8 Click **OK**.

The following message appears only if you have installed the update for Campus Manager:

```
To ensure that you retain the latest device support and bug fixes,
please install
the latest Service Pack (SP) for Campus Manager 4.0.3
You can download the latest SP from
http://www.cisco.com/cgi-bin/tableb
uild.pl/cw2000-campus.
Please refer to the Installation and Setup Guide for details.
```

```
User Tracking Utility 1.0 is not compatible with Campus Manager 4.0.3
User Tracking Utility 1.1.1 is available for Campus Manager 4.0.3
You can download the latest UTU from
http://www.cisco.com/cgi-bin/table
build.pl/cw2000-campus-crypto.
```

Step 9 Click **OK**.

The following message appears:

If you plan to install any of the LMS 2.5 applications later, you must reinstall CiscoWorks LMS 2.5 Dec 2005 Update after installing these applications.

Step 10 Click **OK**.

The Restart dialog box appears after installation completes.

Note You need to restart your machine only if you have installed update for DFM application.

Step 11 Select **Yes, I want to restart my computer now**.

Step 12 Click **Finish**.

Re-installing CiscoWorks LMS 2.5 December 2005 Update

To reinstall CiscoWorks LMS 2.5 December 2005 Update, follow the instructions in the section, [Installing CiscoWorks LMS 2.5 December 2005 Update on Windows, page 9](#).

Caution

If you re-install the base LMS 2.5 applications, you will lose all of the LMS 2.5 update functionalities. You need to re-install CiscoWorks LMS 2.5 December 2005 Update over LMS 2.5, to regain the LMS 2.5 Update functionality.

Known and Resolved Problems

[Table 1](#) contains the known problems for LMS 2.5 December 2005 Update. [Table 2](#) contains the resolved problems.

To review all of the known and resolved problems, see the LMS 2.5.1 application Releases Notes.

**Note**

To obtain more information about known problems, access the Cisco Software Bug Toolkit at <http://www.cisco.com/cgi-bin/Support/Bugtool/home.pl>. (You will be prompted to log into Cisco.com.)

Table 1 *LMS 2.5 December 2005 Update Known Problems*

Bug ID	Summary	Explanation
CSCsc66462 (Common Services 3.0.3)	The Event Log displays device package install failure as an error, without giving exact cause.	This error appears when only one device package is selected for install and it fails to get installed. Workaround: None.
CSCsc71403 (Common Services 3.0.3)	Changes to some Context Sensitive Online Help (OLH) files do not reflect in the CiscoWorks LMS 2.5 December 2005 Update.	Changes do not reflect in the following files, when you launch the OLH for CiscoWorks Common Services 3.0.3 in the CiscoWorks LMS 2.5 December 2005 Update: <ul style="list-style-type: none"> • What's New in This Release (Launch Context Sensitive Online Help from CiscoWorks Homepage and go to the Common Services Online Help. Select What's new in this release from the Table Of Contents). • Context Sensitive Online Help for Modifying Security Certificates (Common Services> Server Security Multi-Server Trust Management Peer Server Certificate Setup). • Context Sensitive Online Help for Setting Up Browser-Server Security Mode (Server Security Single-Server Management Browser-Server Security Mode Setup). (contd.)

Table 1 **LMS 2.5 December 2005 Update Known Problems (continued)**

Bug ID	Summary	Explanation
CSCsc71403 (contd.)	Changes to some Context Sensitive Online Help (OLH) files do not reflect in the CiscoWorks LMS 2.5 December 2005 Update.	<p>Workaround:</p> <p>The updated information for these OLH files are available in the PDF of the User Guide for CiscoWorks Common Services.</p> <p>To launch the PDF file:</p> <ol style="list-style-type: none"> 1. Launch the Context Sensitive Online Help from CiscoWorks Homepage. 2. Select the Online Help for CiscoWorks Common Services. 3. Click View User Guide (Book PDF) from the Table Of Contents. <p>Read the following sections:</p> <ul style="list-style-type: none"> • For What's New in this release: See the New Features section in Chapter 1 Overview. • For Modifying Security Certificates: See the Creating Self Signed Certificate section in Chapter 3 Configuring the Server. • For Setting Up Browser - Server Security Mode: See the Setting up Browser-Server Security section in Chapter 3 Configuring the Server. <p>For all the latest updated information, see the User Guide for CiscoWorks Common Services 3.0.3 at: http://www.cisco.com/univercd/cc/td/doc/product/rtrmgmt/cw2000/cw2000_d/cs303/index.htm</p>

Table 1 *LMS 2.5 December 2005 Update Known Problems (continued)*

Bug ID	Summary	Explanation
CSCsb87452 (DFM 2.0.3)	Rediscovery schedule does not work	When updating to DFM 2.0.3 using LMS 2.5.1 Update 2, the DFM rediscovery schedule sometimes fails to run. Workaround: None.

Table 2 *LMS 2.5 December 2005 Update Resolved Problems*

Bug ID	Summary	Explanation
CSCsc91394 (DFM 2.0.3)	Windows: Notification subscriptions do not work after upgrading DFM using December 2005 Updates	Notifications subscriptions did not work on Windows servers after they were upgraded to DFM 2.0.3 using the LMS 2.5 December 2005 Updates. This was because a process was not correctly reregistering after the installation. This problem has been fixed. To verify that you have the image that contains the fix, do the following: <ol style="list-style-type: none"> 1. From the Common Services home page, select Software Center > Software Update, and click the Device Fault Manager link. A Device Fault Manager details window opens. 2. At the top of the window, under the title <i>Device Fault Manager</i>, verify that the Build ID contains the string REV1. If the string appears, you have the fixed image. If the string does not appear, download and reinstall the Windows image for LMS 2.5 December 2005 Updates (see “Downloading CiscoWorks LMS 2.5 December 2005 Update on Windows” section on page 7).
