

Preface

This preface contains the following sections:

- [Overview, page vii](#)
- [Audience, page vii](#)
- [Conventions, page vii](#)
- [Related Documents, page viii](#)
- [Obtaining Documentation and Submitting a Service Request, page ix](#)

Overview

This guide provides reference information for the commands available in Cisco Intrusion Prevention System 5.1.

This guide also includes a glossary, which contains expanded acronyms and pertinent IPS terms.

This guide is part of the documentation set for Cisco Intrusion Prevention System 5.1. Use this guide in conjunction with the documents listed in [Related Documents, page viii](#).

Audience

This guide is for experienced network security administrators who configure and maintain Cisco Intrusion Prevention System (IPS) sensors, including the supported IPS appliances and modules.

Conventions

This document uses the following conventions:

Item	Convention
Commands, keywords, special terminology, and options that should be selected during procedures	boldface font
Variables for which you supply values and new or important terminology	<i>italic font</i>
Displayed session and system information, paths and filenames	<code>screen font</code>

Item	Convention
Information you enter	boldface screen font
Variables you enter	<i>italic screen font</i>
Menu items and button names	boldface font
Indicates menu items to select, in the order you select them.	Option > Network Preferences

**Note**

Means *reader take note*. Notes identify important information that you should reflect upon before continuing, contain helpful suggestions, or provide references to materials not contained in the document.

**Caution**

Means *reader be careful*. In this situation, you might do something that could result in equipment damage, loss of data, or a potential breach in your network security.

**Tip**

Identifies information to help you get the most benefit from your product

**Warning**

Identifies information that you must heed to prevent damaging yourself, the state of software, or equipment. Warnings identify definite security breaches that will result if the information presented is not followed carefully.
