## Document Objectives

The purpose of this guide is to help you configure the Cisco AnyConnect VPN Client parameters on the security appliance. This guide does not cover every feature, but describes only the most common configuration scenarios.

You can configure and monitor the security appliance by using either the command-line interface or ASDM, a web-based GUI application. ASDM includes configuration wizards to guide you through some common configuration scenarios, and online Help for less common scenarios. For more information, see: <http://www.cisco.com/univercd/cc/td/doc/product/netsec/secmgmt/asdm/index.htm>

This guide applies to the Cisco ASA 5500 series security appliances (ASA 5505 and higher). Throughout this guide, the term “security appliance” applies generically to all supported models, unless specified otherwise. The PIX family of security appliances is not supported.

## Audience

This guide is for network managers who perform any of the following tasks:

- Manage network security
- Install and configure security appliances
- Configure VPNs
