Preface

This document lists and describes the routing messages for all the Cisco Nexus platforms. The system software sends these messages to the console (and, optionally, to a logging server on another system) during operation. Not all messages indicate a problem with your system. Some messages are purely informational, while others might help diagnose problems with links, internal hardware, or the system software.

This preface includes the following sections:

- [Audience, page ix](#)
- [Organization, page ix](#)
- [Document Conventions, page ix](#)
- [Related Documentation, page xi](#)
- [Obtaining Documentation and Submitting a Service Request, page xii](#)

Audience

This guide is for system administrators who are responsible for managing Cisco Nexus systems.

Organization

This guide is organized as follows:

Chapter	Title	Description
Chapter 1	Introduction to Routing Messages, page 1	Describes the structure of system messages and the format of system log files.
Chapter 2	Routing Messages and Recovery Procedures, page 1	Lists the messages that may appear in log files, and indicates suggested remedies where applicable.

Document Conventions

Command descriptions use these conventions:

Send document comments to nexus7k-docfeedback@cisco.com

Convention	Description
boldface font	Commands and keywords are in boldface.
italic font	Arguments for which you supply values are in italics.
[]	Elements in square brackets are optional.
[x y z]	Optional alternative keywords are grouped in brackets and separated by vertical bars.
string	A nonquoted set of characters. Do not use quotation marks around the string or the string will include the quotation marks.

Screen examples use these conventions:

screen font	Terminal sessions and information that the switch displays are in screen font.
boldface screen font	Information that you must enter is in boldface screen font.
<i>italic screen font</i>	Arguments for which you supply values are in italic screen font.
< >	Nonprinting characters, such as passwords, are in angle brackets.
[]	Default responses to system prompts are in square brackets.
!, #	An exclamation point (!) or a pound sign (#) at the beginning of a line of code indicates a comment line.

This document uses the following conventions:

Note

Means reader *take note*. Notes contain helpful suggestions or references to material not covered in the manual.

Caution

Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.
