

Product Overview

The Catalyst 6000 family switches support the following configurations:

- Supervisor Engine 2, Policy Feature Card 2 (PFC2), and Multilayer Switch Feature Card 2 (MSFC2)
- Supervisor Engine 2 and PFC2
- Supervisor Engine 1, PFC, and MSFC or MSFC2
- Supervisor Engine 1 and PFC
- Supervisor Engine 1

Note

The Switch Fabric Module is supported only in Catalyst 6500 series switches.

Refer to the *Release Notes for Catalyst 6000 Family Software Release 6.x* publication for complete information about the chassis, modules, software features, protocols, and MIBs supported by the Catalyst 6000 family switches.

Note

This publication includes the information that previously was in the *Catalyst 6000 Family Multilayer Switch Feature Card (12.x) and Policy Feature Card Configuration Guide*.
