

SFE1000P Firmware Release Note

Software version	1.0.0.20	06/11/2007
Boot version	1.0.0.3	12/31/2006

Known Issues

=====

1. VCT

The "Advanced" button disappear after the test for a port

Recommended work around : Reload the page

2. VCT

On FE ports when no cable connected

the result is "Open cable" instead of "No cable"

3. Upgrade

Copy file from client to running-configuration is not supported in this product.

4. Bridging→multicast→igmp snooping

Runtime error displayed when opening help file

5. Admin→diagnostic→port mirroring

Help file mentions that monitor on Rx is the default value yet the default value is Tx

6. DNS

As error message appears while configuring 9th DNS server as the Maximal value is 8.
