

A

- accessing BARS 3-2
- accessing the backup file 3-10
- adding a data source server 1-6
- application versions that BARS supports 1-4
- applications supported 1-3

B

- BackAdmin account 2-3
- Backadmin Private Password Phrase 2-3
- backing up now 3-8
- backup
 - data 1-6
 - destination 3-7
 - file 1-6, 3-7
 - file location 3-10
 - location 1-7
 - now 3-8
 - server 1-5, 2-3
 - storage location 3-4, 3-7, 4-1
 - tar file 3-7
 - target 2-3
- backup target 1-6
- BARS
 - backup process components 1-4
 - installation 2-2
 - restore process 4-1
 - version 2-4

C

- Call Detail Records Administrative Reporting 1-8
- CDR Analysis and Reporting 1-8
- CDR/CMR files 1-5
- changing the purpose of a server 2-4
- Cisco Customer Response Solutions 1-9
- Cisco Emergency Responder 1-11
- Cisco Unified CallManager cluster 1-6
- Cisco Unified CallManager Publisher Database 1-7
- Cisco Unified CallManager Subscriber Database 1-8
- components of BARS backup process 1-4
- Configure Scheduler screen 1-7
- Configured Servers list 3-3
- configuring BARS for the first time 3-2
- CRS cluster restoration 4-7

D

- data backed up by BARS 1-7
- data source server 1-6
- data source server configuration 3-3
- data source server deletion 3-4
- default schedule 1-6, 3-6
- disabling the Scheduler 3-5
- DNS/IP address field 3-3

E

- enabling the Scheduler 3-5
- erasing the log 3-6
- error messages from restore process 4-2
