

Adding User Device Profile File Format

After you have entered all the values into the text-based CSV data file in the order that the file format specified, you need to upload the text-based CSV data file to the first node in Cisco Unified CallManager. For more information on uploading files, see [“Uploading a File” section on page 2-3](#). You must then associate the file format with the text-based CSV data file.

Adding a File Format

To associate the file format with the text-based CSV data file, use the following procedure.

Procedure

-
- Step 1** Choose **Bulk Administration > User Device Profile > UDP File Format > Add File Format**. The Add File Format Configuration window displays.
- Step 2** In the File Name field, choose the CSV data file that you created for this bulk transaction.
- Step 3** In the File Format Name field, choose the file format that you created for this type of bulk transaction.
- Step 4** To add the matching file format with the CSV data file, click **Submit**.

A job is created in the Job Scheduler option in the Bulk Administration menu. Use Job Configuration window to modify the job schedule.

For more information on jobs, see [Chapter 52, “Scheduling Jobs.”](#)

For information on log files, see [“BAT Log Files” section on page 57-17](#).
