## Overview

*Cisco Unified IP Phone Administration Guide for Cisco Unified Communications Manager 7.1* provides the information you need to understand, install, configure, manage, and troubleshoot the Cisco Unified IP Phone on a Voice-over-IP (VoIP) network.

Because of the complexity of a Unified Communications network, this guide does not provide complete and detailed information for procedures that you need to perform in Cisco Unified Communications Manager (formerly Cisco Unified CallManager) or other network devices. See the [“Related Documentation”](#) section on page xii for a list of related documentation.

## Audience

Network engineers, system administrators, or telecom engineers should review this guide to learn the steps required to properly set up the Cisco Unified IP Phone.

The tasks described are administration-level tasks and are not intended for end-users of the phones. Many of the tasks involve configuring network settings and affect the phone’s ability to function in the network.

Because of the close interaction between the Cisco Unified IP Phone and Cisco Unified Communications Manager, many of the tasks in this manual require familiarity with Cisco Unified Communications Manager.

## Organization

This manual is organized as follows:

<a href="#">Chapter 1, “An Overview of the Cisco Unified IP Phone”</a>	Provides a conceptual overview and description of the Cisco Unified IP Phone.
<a href="#">Chapter 2, “Preparing to Install the Cisco Unified IP Phone on Your Network”</a>	Describes how the Cisco Unified IP Phone interacts with other key IP telephony components, and provides an overview of the tasks required prior to installation.
<a href="#">Chapter 3, “Setting Up the Cisco Unified IP Phone”</a>	Describes how to properly and safely install and configure the Cisco Unified IP Phone on your network.

Chapter 4, “Configuring Settings on the Cisco Unified IP Phone”	Describes how to configure network settings, verify status, and make global changes to the Cisco Unified IP Phone.
Chapter 5, “Configuring Features, Templates, Services, and Users”	Provides an overview of procedures for configuring telephony features, configuring directories, configuring phone button and softkey templates, setting up services, and adding users to Cisco Unified Communications Manager.
Chapter 6, “Customizing the Cisco Unified IP Phone”	Explains how to customize phone ring sounds, background images, and the phone idle display at your site.
Chapter 7, “Viewing Model Information, Status, and Statistics on the Cisco Unified IP Phone”	Explains how to view model information, status messages, network statistics, and firmware information from the Cisco Unified IP Phone.
Chapter 8, “Monitoring the Cisco Unified IP Phone Remotely”	Describes the information that you can obtain from the phone’s web page, and how to use this information to remotely monitor the operation of a phone and to assist with troubleshooting.
Chapter 9, “Troubleshooting and Maintenance,”	Provides tips for troubleshooting the Cisco Unified IP Phone.
Appendix A, “Providing Information to Users Via a Website”	Provides suggestions for setting up a website for providing users with important information about their Cisco Unified IP Phones.
Appendix B, “Feature Support by Protocol for the Cisco Unified IP Phone 7975G, 7971G-GE, 7970G, 7965G, and 7945G”	Provides information about feature support for the Cisco Unified IP Phone using the SCCP or SIP protocol.
Appendix C, “Supporting International Users”	Provides information about setting up phones in non-English environments.
Appendix D, “Technical Specifications”	Provides technical specifications of the Cisco Unified IP Phone.
Appendix E, “Basic Phone Administration Steps”	Provides procedures for basic administration tasks such as adding a user and phone to Cisco Unified Communications Manager and then associating the user to the phone.
