Requirements for Jabber for Cisco Unified MeetingPlace Release 6.0

System requirements for Jabber for Cisco Unified MeetingPlace Release 6.0 can be found on the DocWiki at this link:

http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_System_Requirements

Compatibility Information for Jabber for Cisco Unified MeetingPlace Release 6.0

For information about the compatibility of Jabber for Cisco Unified MeetingPlace Release 6.0 with other Cisco Unified MeetingPlace components, see the compatibility matrix on the DocWiki at this link:

http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_Compatibility_Matrix.

Related Documentation

For descriptions and locations of Cisco Unified MeetingPlace documentation on Cisco.com, refer to the *Documentation Guide for Cisco Unified MeetingPlace*. The document is shipped with Cisco Unified MeetingPlace and is available at

http://www.cisco.com/en/US/products/sw/ps5664/ps5669/products_documentation_roadmaps_list.html.

The complete documentation set for administrators for Cisco Unified MeetingPlace Release 6.0 is now available in wiki format at

http://docwiki.cisco.com/index.php/Cisco_Unified_MeetingPlace,_Release_6.x. Cisco community members with CCO passwords can contribute expertise to articles and exchange ideas on the Discussion page associated with each article. For more information, click the **About DocWiki** link at the bottom of any page on the DocWiki.

Information to Give to End Users

These release notes are written for system administrators and are not intended for end users. As a result, end users may not be aware of new features or know where to find applicable documentation.

Please give the following information to end users:

- List of new features in this release. See [New and Changed Requirements and Functionality, page 3](#).
- End user documentation can be found on Cisco.com at http://www.cisco.com/en/US/products/sw/ps5664/ps5669/products_user_guide_list.html
- System administrator documentation can be found on the DocWiki at http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x

- To search for documentation on the DocWiki, we recommend using Google. Go to Google.com and enter this: *<your search term>* **site:docwiki.cisco.com**. where *<your search term>* is the term you want to search.

New and Changed Requirements and Functionality

- [Release 6.0\(600.0\), page 3](#)
- [Release 6.0\(102.0\), page 3](#)

Release 6.0(600.0)

Jabber for Cisco Unified MeetingPlace Release 6.0(600.0) is a maintenance release that contains fixes to defects and product enhancements. See the “[Caveats](#)” [section on page 4](#) for a list of these defects and enhancements.

This release also includes a functional change where we removed the first (pre-join) screen for invitees and combined it with the Join form. See CSCsz21139 for more details.

Release 6.0(102.0)

Jabber for Cisco Unified MeetingPlace requires the purchase of a Jabber integration option key. The option key must be entered on the Audio Server from the MeetingTime client before installing or upgrading to Jabber for Cisco Unified MeetingPlace Release 6.0.

For instructions on entering the option key and installing or upgrading Jabber for Cisco Unified MeetingPlace Release 6.0, see the DocWiki at http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_Installing_or_Upgrading_Cisco_Unified_MeetingPlace_for_Jabber.

Installation and Upgrade Information

- [Installing Jabber for Cisco Unified MeetingPlace Release 6.0 for the First Time, page 3](#)
- [Upgrading to Jabber for Cisco Unified MeetingPlace Release 6.0, page 4](#)

Installing Jabber for Cisco Unified MeetingPlace Release 6.0 for the First Time

For instructions on installing Jabber for Cisco Unified MeetingPlace Release 6.0, see the DocWiki at http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_Installing_or_Upgrading_Cisco_Unified_MeetingPlace_for_Jabber.

Upgrading to Jabber for Cisco Unified MeetingPlace Release 6.0

With Cisco Unified MeetingPlace Release 6.0, all Cisco Unified MeetingPlace integration components must be installed on a Cisco MCS server running a Microsoft Windows Server 2003-based Cisco MCS operating system. Changing the operating system from the Windows 2000 Server-based version to the Windows 2003-based version requires a new installation. Cisco does not support upgrading the operating system from the Windows 2000-based version to the Windows 2003-based version.

Although Jabber for Cisco Unified MeetingPlace is not installed on a Cisco MCS server, you must migrate the Web Server to Release 6.0 before upgrading Jabber. See the DocWiki at http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_Installing_or_Upgrading_Cisco_Unified_MeetingPlace_for_Jabber.

Limitations and Restrictions

The following caveat has been closed, which means that Cisco acknowledges that there is a problem but is choosing not to fix it. See the “Using Bug Toolkit” section on page 4 for information about accessing these caveats.

Table 1 Jabber for Cisco Unified MeetingPlace Release 6.0 Closed Caveats

Caveat Number	Severity	Component	Description
CSCse09684	3	jabber	Existing open browser is used for joining to MeetingPlace web via Jabber

Caveats

- [Using Bug Toolkit, page 4](#)
- [Open Caveats, page 5](#)
- [Resolved Caveats, page 5](#)

Using Bug Toolkit

Known problems (bugs) are graded according to severity level. These release notes contain descriptions of the following:

- All severity level 1 or 2 bugs.
- Significant severity level 3 bugs.
- All customer-found bugs.

You can search for problems by using the Cisco Software Bug Toolkit.

Before You Begin

To access Bug Toolkit, you need the following items:

- Internet connection
- Web browser

- Cisco.com user ID and password

Procedure

-
- Step 1** To access the Bug Toolkit, go to <http://tools.cisco.com/Support/BugToolKit/action.do?hdnAction=searchBugs>.
- Step 2** Log in with your Cisco.com user ID and password.
- Step 3** To look for information about a specific problem, enter the bug ID number in the “Search for Bug ID” field, then click **Go**.
-

For information about how to search for bugs, create saved searches, and create bug groups, click **Help** in the Bug Toolkit page.

Open Caveats

There are no open caveats for Jabber for Cisco Unified MeetingPlace Release 6.0 that meet this criteria:

- All severity level 1 or 2 bugs.
- Significant severity level 3 bugs.
- All customer-found bugs.

Resolved Caveats

This section lists caveats that are resolved but that may have been open in previous releases.

Bugs are listed in order of severity and then in alphanumeric order by bug identifier. Because defect status continually changes, be aware that this document reflects a snapshot of the defects that were resolved at the time this report was compiled. For an updated view of resolved defects, access the Bug Toolkit (see the “Using Bug Toolkit” section on page 4).

The following sections list caveats that are resolved in Jabber for Cisco Unified MeetingPlace but that may have been open in previous releases:

- [Release 6.0\(600.0\), page 5](#)
- [Release 6.0\(102.0\), page 6](#)

Release 6.0(600.0)

[Table 2](#) lists the caveats that were resolved in Jabber for Cisco Unified MeetingPlace Release 6.0(600.0).

Table 2 *Jabber for Cisco Unified MeetingPlace Release 6.0(600.0) Resolved Caveats*

Caveat Number	Severity	Component	Description
CSCsg68480	2	jabber	Jabber 4.2 version crashing the JabberMeetingPlace Component 5_4_102_0

Release 6.0(102.0)

There are no resolved caveats for Jabber for Cisco Unified MeetingPlace Release 6.0(102.0) that meet this criteria:

- All severity level 1 or 2 bugs.
- Significant severity level 3 bugs.
- All customer-found bugs.

Troubleshooting Information

Troubleshooting information for Jabber for Cisco Unified MeetingPlace can be found on the DocWiki at http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_Troubleshooting_Cisco_Unified_MeetingPlace_for_Jabber.

Obtaining Documentation, Obtaining Support, and Security Guidelines

For information on obtaining documentation, obtaining support, providing documentation feedback, security guidelines, and also recommended aliases and general Cisco documents, see the monthly *What's New in Cisco Product Documentation*, which also lists all new and revised Cisco technical documentation, at:
