

Release Notes for Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0

Revised: August 10, 2009 10:22 am, OL-13413-04

These release notes contain information about new and changed support, new and changed functionality, limitations and restrictions, and open and resolved caveats for Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0, up to and including the following:

- Release 6.0(537.0) (MR5 version)
- Release 6.0(407.0) (MR4 version)
- Release 6.0(307.0) (MR3 version)
- Release 6.0(214.0) (MR2 version)
- Release 6.0(115.0) (MR1 version)
- Release 6.0(14.0) (FCS version)

These release notes are updated for every maintenance release but not for patches or hot fixes. Before you install Microsoft Outlook for Cisco Unified MeetingPlace, we recommend that you review this document for information about issues that may affect your system. To view the release notes for previous versions of Microsoft Outlook for Cisco Unified MeetingPlace, go to:
http://www.cisco.com/en/US/products/sw/ps5664/ps5669/prod_release_notes_list.html.

You can access the latest software upgrades for all versions of Microsoft Outlook for Cisco Unified MeetingPlace on the Cisco Software Center website at
<http://www.cisco.com/kobayashi/sw-center/sw-voice.shtml>.

Introduction

Microsoft Outlook for Cisco Unified MeetingPlace integrates Cisco Unified MeetingPlace with Microsoft Outlook. It simplifies Cisco Unified MeetingPlace by allowing end users to perform the following tasks:

- Receive Cisco Unified MeetingPlace meeting notifications in their Microsoft Outlook inbox.
- Automatically place meetings in their Microsoft Outlook calendars.
- Attend meetings with a single click.
- Schedule meetings by using the familiar Microsoft Outlook interface.

This product is an add-on to the Cisco Unified MeetingPlace family of products.

System Requirements

- [System Requirements for Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0, page 2](#)
- [Compatibility Information for Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0, page 2](#)
- [Determining the Software Version of Microsoft Outlook for Cisco Unified MeetingPlace, page 3](#)

System Requirements for Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0

System requirements for Microsoft Outlook for Cisco Unified MeetingPlace can be found on the DocWiki at

http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_Requirements_for_Cisco_Unified_MeetingPlace_for_Microsoft_Outlook_6.0#Requirements_for_Cisco_Unified_MeetingPlace_for_Microsoft_Outlook_6.0.

Compatibility Information for Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0

For information about the compatibility of Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0 with other Cisco Unified MeetingPlace components, see the DocWiki at

http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_Compatibility_Matrix.

Determining the Software Version of Microsoft Outlook for Cisco Unified MeetingPlace

You can determine the software version by using the Microsoft Outlook scheduling form.

Procedure

-
- Step 1** Open your Microsoft Outlook calendar and double-click a time.
 - Step 2** Click the **MeetingPlace** tab.
 - Step 3** Click **About**.

The Microsoft Outlook for Cisco Unified MeetingPlace and Cisco Unified MeetingPlace Web Conferencing versions are displayed in the About Cisco MeetingPlace for Microsoft Outlook window.

You can also determine the software version by going to the CLI and using the **gwstatus** command.

Procedure

-
- Step 1** Telnet to the Cisco Unified MeetingPlace Audio Server system and log in as a technician.
 - Step 2** At the tech\$ prompt, enter **gwstatus**.

The command output includes the version of Microsoft Outlook for Cisco Unified MeetingPlace (listed as Outlook:GW).

Related Documentation

For descriptions and locations of Cisco Unified MeetingPlace documentation on Cisco.com, refer to the *Documentation Guide for Cisco Unified MeetingPlace*. The document is shipped with Cisco Unified MeetingPlace and is available at http://www.cisco.com/en/US/products/sw/ps5664/ps5669/products_documentation_roadmaps_list.html.

The complete administrator documentation set for Cisco Unified MeetingPlace Release 6.0 is now available in wiki format at http://docwiki.cisco.com/index.php/Cisco_Unified_MeetingPlace,_Release_6.x. Cisco community members with CCO passwords can contribute expertise to articles and exchange ideas on the Discussion page associated with each article. For more information, click the **About DocWiki** link at the bottom of any page on the DocWiki.

Information to Give to End Users

These release notes are written for system administrators and are not intended for end users. As a result, end users may not be aware of new features or know where to find applicable documentation.

Please give the following information to end users:

- List of new features in this release. See [New and Changed Requirements and Functionality, page 4](#).
- End user documentation can be found on Cisco.com at http://www.cisco.com/en/US/products/sw/ps5664/ps5669/products_user_guide_list.html
- System administrator documentation can be found on the DocWiki at http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x
- To search for documentation on the DocWiki, we recommend using Google. Go to Google.com and enter this: `<your search term> site:docwiki.cisco.com`. where `<your search term>` is the term you want to search.

New and Changed Requirements and Functionality

This section contains information about new and changed requirements, support, and functionality in the Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0 time frame only. Refer to the release notes of the applicable version for information on new and changed support with earlier versions.

- [Release 6.0\(537.0\), page 4](#)
- [Release 6.0\(407.0\), page 4](#)
- [Release 6.0\(307.0\), page 5](#)
- [Release 6.0\(214.0\), page 5](#)
- [Release 6.0\(115.0\), page 5](#)
- [Release 6.0\(14.0\), page 5](#)

Release 6.0(537.0)

In this release, the mechanism for delivering the backend notifications has changed. Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0(537.0) delivers back-end notifications to Microsoft Outlook users using the new iCalendar gateway instead of using CDO. See the DocWiki for the updated requirements for this new implementation of Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0(537.0) at

http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_Outlook_Integration_Changes_for_Cisco_Unified_MeetingPlace_Release_6.0%2C_Maintenance_Release_5.

Also, meetings that are scheduled from the Cisco Unified MeetingPlace web interface do not have the MeetingPlace tab.

We now support Microsoft Exchange 2007 and Microsoft Outlook 2007 Service Pack 2.

Release 6.0(407.0)

Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0(407.0) is a maintenance release that contains fixes to defects and product enhancements. See the “[Caveats](#)” section on [page 8](#) for a list of these defects and enhancements.

Key enhancements include the following:

- CSCsh61101: User name conversion for Windows Integrated Authentication (WIA)
- Force reservationless meetings configuration

Release 6.0(307.0)

Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0(307.0) is a maintenance release that contains fixes to defects and product enhancements. See the [“Caveats” section on page 8](#) for a list of these defects and enhancements.

Release 6.0(214.0)

This release of the Cisco Unified MeetingPlace system contains support for Cisco WebEx. This release of Microsoft Outlook for Cisco Unified MeetingPlace provides end users with the option to select Cisco WebEx as their meeting provider when using the Microsoft Outlook plug-in to schedule conferences.

Note the following changes:

- The Microsoft Outlook for Cisco Unified MeetingPlace delegate users need to have attendant-level privileges or higher in order to schedule either Cisco Unified MeetingPlace or Cisco WebEx meetings on behalf of someone else.
- For delegation, the Cisco Unified MeetingPlace username of the user on whose behalf you schedule a meeting must be the same as the username in his e-mail address. If you have a Microsoft Exchange mailbox alias, the alias name must match the Cisco Unified MeetingPlace username.

Release 6.0(115.0)

This release supports Microsoft Outlook 2007 and Windows Vista. See the [“Reinstalling Microsoft Outlook for Cisco Unified MeetingPlace After Migrating to Microsoft Outlook 2007” section on page 6](#) for more information.

Release 6.0(14.0)

- [Meeting Templates Available, page 5](#)
- [Cisco Security Agent for Cisco Unified MeetingPlace Support, page 5](#)

Meeting Templates Available

When using the Microsoft Outlook for Cisco Unified MeetingPlace scheduling form to schedule a Cisco Unified MeetingPlace meeting, users can select a meeting template for the meeting. The template controls the meeting room format and participant permissions for the meeting. The online help for Microsoft Outlook for Cisco Unified MeetingPlace includes a description of the meeting template field.

Cisco Security Agent for Cisco Unified MeetingPlace Support

The Cisco Security Agent for Cisco Unified MeetingPlace is now supported on the Microsoft Outlook for Cisco Unified MeetingPlace server. For installation instructions, see the *Release Notes for Cisco Security Agent for Cisco Unified MeetingPlace* at http://www.cisco.com/en/US/products/sw/ps5664/ps5669/prod_release_notes_list.html.

Installation and Upgrade Information

- [Reinstalling Microsoft Outlook for Cisco Unified MeetingPlace After Migrating to Microsoft Outlook 2007, page 6](#)
- [Installing Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0 for the First Time, page 6](#)
- [Upgrading to Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0, page 6](#)
- [Upgrading from One Maintenance Release to Another Maintenance Release, page 7](#)

Reinstalling Microsoft Outlook for Cisco Unified MeetingPlace After Migrating to Microsoft Outlook 2007

You cannot upgrade from a previous version of Microsoft Outlook for Cisco Unified MeetingPlace to a newer version if you have recently migrated to Microsoft Outlook 2007 and Windows Vista. The first time you upgrade to a newer version of Microsoft Outlook for Cisco Unified MeetingPlace after you have migrated to Microsoft Outlook 2007 and Windows Vista, you must uninstall the previous version and install the new version.

The Microsoft Outlook for Cisco Unified MeetingPlace executable file comes in two forms: setup.exe and upgrade.exe. Normally, you use the upgrade.exe file to upgrade desktops to the latest version; however, if you have recently migrated to Microsoft Outlook 2007 and Windows Vista, the upgrade.exe file does not work. Instead, you have to uninstall the previous version of Microsoft Outlook for Cisco Unified MeetingPlace and then run the setup.exe file. Consequently, end users have to log in once after the install.

Installing Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0 for the First Time

For instructions on installing Microsoft Outlook for Cisco Unified MeetingPlace, see http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_Installing_Cisco_Unified_MeetingPlace_for_Outlook.

Upgrading to Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0

With Cisco Unified MeetingPlace Release 6.0, all Cisco Unified MeetingPlace integration components must be installed on a Cisco MCS server running a Microsoft Windows 2003 Server-based Cisco MCS operating system. Changing the operating system from the Windows 2000 Server-based version to the Windows 2003 Server-based version requires a new installation. Cisco Systems does not support upgrading the operating system from the Windows 2000 Server-based version to the Windows 2003 Server-based version.

Migrating to Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0 involves backing up specific data, installing the Windows 2003 Server-based operating system, reinstalling Cisco Unified MeetingPlace components, and restoring data. See http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_Upgrading_to_Cisco_Unified_MeetingPlace_Release_6.0.

Upgrading from One Maintenance Release to Another Maintenance Release

- To install Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0, run the Release 6.0 installation program.
- To install Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0 MR1, run the 6.0MR1 installation program. If your system has no version of Microsoft Outlook for Cisco Unified MeetingPlace, the program installs MR1. If your system currently has Release 6.0, the program upgrades to MR1.
- To install Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0 MR2, run the 6.0MR2 installation program. If your system has no version of Microsoft Outlook for Cisco Unified MeetingPlace, the program installs MR2. If your system currently has Release 6.0 or MR1, the program upgrades to MR2.
- To install Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0 MR3, run the 6.0MR3 installation program. If your system has no version of Microsoft Outlook for Cisco Unified MeetingPlace, the program installs MR3. If your system currently has Release 6.0, MR1, or MR2, the program upgrades to MR3.
- To install Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0 MR4, run the 6.0MR4 installation program. If your system has no version of Microsoft Outlook for Cisco Unified MeetingPlace, the program installs MR4. If your system currently has Release 6.0, MR1, MR2, or MR3, the program upgrades to MR4.
- To install Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0 MR5, follow the instructions on the DocWiki at http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_6.x_-_Outlook_Integration_Changes_for_Cisco_Unified_MeetingPlace_Release_6.0%2C_Maintenance_Release_5.

Limitations and Restrictions

- [Release 6.0\(537.0\), page 7](#)
- [Release 6.0\(407.0\), page 8](#)

Release 6.0(537.0)

The following caveats have been closed, which means that Cisco acknowledges that there is a problem but is choosing not to fix it. See the “[Using Bug Toolkit](#)” section on page 9 for information about accessing these caveats.

Table 1 *Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0(537.0) Closed Caveats*

Caveat Number	Severity	Component	Description
CSCsg47534	4	outlook	Users without MP4OL getting error with invite, need better warning message

Release 6.0(407.0)

The following caveats have been closed, which means that Cisco acknowledges that there is a problem but is choosing not to fix it. See the [“Using Bug Toolkit” section on page 9](#) for information about accessing these caveats.

Table 2 *Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0(407.0) Closed Caveats*

Caveat Number	Severity	Component	Description
CSCsg38157	2	outlook	When the Microsoft Outlook calendar for an end user is large, notification performance slows down. This also happens when the centralized calendar folders are large.
CSCsc88881	3	outlook	Name of invitee is corrupted when scheduled from MP web
CSCsj59230	3	outlook	Invitee cannot attend a continuous meeting from MP tab.
CSCsq54538	3	outlook	User needs to close Outlook to update his password
CSCIt21404	4	outlook	Scheduler name is doubled in Invitees list
CSCIt23083	4	outlook	Unable to change expired password to a blank password
CSCsa55740	4	outlook	Contradicting error and information messages while upgrade to 5.3.0.24
CSCsb70977	4	outlook	MeetingPlace tab on back end meeting is dimensionally fixed
CSCsc84460	4	outlook	Upgrade prompt should disappear on use
CSCsd06858	4	outlook	HTML source is shown in Check Availability when MP Web is partial down
CSCso17026	4	outlook	Reschedule meeting popped up out of the blue
CSCso71198	4	outlook	Delegate can reschedule and delete mtg on Web as Author
CSCsq24187	4	outlook	Inviting user that does not have MPOL plug-in installed
CSCsq48862	4	outlook	When cookie missing, delete mtg w/o login causes unexpected behavior
CSCsq48910	4	outlook	When cookie cleaned, reschedule mtg by drag & drop fails to move the mtg
CSCsq49211	4	outlook	OL 2007: Outlook user is prompted to save a meeting with no changes
CSCsq68826	4	outlook	Deleting the meeting from OL when disconnected
CSCsq68837	4	outlook	Disassociating meeting from MP when disconnected
CSCsu08048	4	outlook	Outlook MP tab error seen by OL delegate with “Author” permission
CSCsu08131	4	outlook	Delegate: Possible to reschedule the meeting in the past
CSCsb82832	5	outlook	Backend meeting notification hour field has leading zero
CSCsc26955	5	outlook	Mtg organizer displayed as attendant redundantly in the schedule tab
CSCso99485	5	notifications	Correct rescheduling instruction

Caveats

- [Using Bug Toolkit, page 9](#)
- [Open Caveats, page 9](#)
- [Resolved Caveats, page 10](#)

Using Bug Toolkit

Known problems (bugs) are graded according to severity level. These release notes contain descriptions of the following:

- All severity level 1 or 2 bugs.
- Significant severity level 3 bugs.
- All customer-found bugs.

You can search for problems by using the Cisco Software Bug Toolkit.

Before You Begin

To access Bug Toolkit, you need the following items:

- Internet connection
- Web browser
- Cisco.com user ID and password

Procedure

-
- Step 1** To access the Bug Toolkit, go to <http://tools.cisco.com/Support/BugToolKit/action.do?hdnAction=searchBugs>.
- Step 2** Log in with your Cisco.com user ID and password.
- Step 3** To look for information about a specific problem, enter the bug ID number in the “Search for Bug ID” field, then click **Go**.
-

For information about how to search for bugs, create saved searches, and create bug groups, click **Help** in the Bug Toolkit page.

Open Caveats

The caveats in [Table 3](#) describe possible unexpected behavior in the latest Microsoft Outlook for Cisco Unified MeetingPlace release. These caveats may also be open in previous releases. Bugs are listed in order of severity and then in alphanumeric order by bug identifier.

Table 3 *Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0 Open Caveats*

Caveat Number	Severity	Component	Description
CSCsq19421	3	outlook	Backend, exceptions not deleted for invitees from different time zone
CSCsy76740	3	outlook	MP for OL form Triggers secret cancellation of meeting OL 2007
CSCta59084	3	outlook	Backend: added invitee does not receive notification
CSCta59190	3	outlook	Frontend: Invitee receives 2 reschedule notifications
CSCsy39013	4	outlook	MP Outlook send update window briefly shows up and disappear

Resolved Caveats

This section lists caveats that are resolved but that may have been open in previous releases.

Bugs are listed in order of severity and then in alphanumeric order by bug identifier. Because defect status continually changes, be aware that this document reflects a snapshot of the defects that were resolved at the time this report was compiled. For an updated view of resolved defects, access the Bug Toolkit (see the “Using Bug Toolkit” section on page 9).

The following sections list caveats that are resolved in Microsoft Outlook for Cisco Unified MeetingPlace but that may have been open in previous releases:

- [Release 6.0\(537.0\), page 10](#)
- [Release 6.0\(407.0\), page 11](#)
- [Release 6.0\(307.0\), page 13](#)
- [Release 6.0\(214.0\), page 14](#)
- [Release 6.0\(115.0\), page 15](#)
- [Release 6.0\(14.0\), page 17](#)

Release 6.0(537.0)

Table 4 lists the caveats that were resolved in Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0(537.0).

Table 4 Microsoft Outlook for Cisco Unified MeetingPlace Caveats Resolved in Release 6.0(537.0)

Caveat Number	Severity	Component	Description
CSCsz36585	1	outlook	MP Outlook iCal Notify services do not start after clean install
CSCsz81585	1	outlook	User with account on exchange 2007 can receive only SMTP notif
CSCsv80925	2	outlook	Backend Notifications Performance hit - iCal implementation
CSCsz33945	2	outlook	Outlook: cannot reopen recurring meetings. Outlook crashes
CSCsz48648	2	outlook	OL crashes when invitee accept notification
CSCsz53325	2	outlook	Backend notification are not going out
CSCsz81667	2	outlook	If no authentication required for iCalendar Gateway error occurs
CSCsz87825	2	outlook	Outlook GW dedicated account has to be Domain Admin on Exchange 07
CSCta16548	2	outlook	MR5 and WebConnect multiple MPOL databases
CSCsj67416	3	outlook	Appointment tab meeting details are incorrect
CSCsv80569	3	outlook	Unchecking publicly listed meeting has no affect on MPOL scheduled mtgs
CSCsw31652	3	outlook	MPOL 5.4.1.12 Script 502 Error for profile contain '
CSCsw36187	3	outlook	Non-English user cannot attend with CTA on external meetings
CSCsx45778	3	outlook	Install option /admin limits MP for OL form to 3 servers
CSCsx53297	3	outlook	MP Outlook Plugin overwrite Location information on Outlook 2007
CSCsy13648	3	outlook	Error 22631 MPOL pages will not load
CSCsy55344	3	outlook	MS Outlook 2007 SP2 and KB961752 hotfix break Outlook plug-in

Table 4 *Microsoft Outlook for Cisco Unified MeetingPlace Caveats Resolved in Release 6.0(537.0)*

Caveat Number	Severity	Component	Description
CSCsy88437	3	outlook	Emails are not sent when scheduling or updating a long recurring chain
CSCsy91010	3	outlook	OL plugin installed in admin mode caused malicious code warning popup
CSCsz34452	3	outlook	Video meeting notifications use wrong template if Invited Profile Users
CSCsz36198	3	outlook	OL2k7 Notification not send when click Save and Send
CSCsz68721	3	outlook	Drag and drop to reschedule fails in MP for OL 2007 sp2
CSCsc33173	4	outlook	Improper formatting on notification
CSCsc87926	4	outlook	User gets an error when using call me feature on MP for OL tab
CSCsv33256	4	outlook	Buenos Aires time zone displays text one hour earlier then meeting time
CSCsw64023	4	outlook	After ending a meeting, a “meeting updated” notification is sent
CSCsy01850	4	outlook	Tracking TAB Failure with MP for OL form installed
CSCsy49099	4	outlook	<!--#Cisco ListInvitees --> or <!--#LATD ListInvitees --> does not work
CSCsy75197	4	outlook	WebPart does not have a matching end in template file MPOLChkAvail.tpl
CSCsy80564	4	outlook	Location field gets overwritten when adding resources
CSCsz02178	4	outlook	“Max Adv days to Schedule” not affecting resvless meeting from OL
CSCsz29949	4	outlook	MPOutlook MR4 WIA case conversion defaults to None after upgrade

Release 6.0(14.0)

There are no resolved caveats for Microsoft Outlook for Cisco Unified MeetingPlace Release 6.0(14.0) that meet this criteria:

- All severity level 1 or 2 bugs.
- Significant severity level 3 bugs.
- All customer-found bugs.

Documentation Updates

- [Microsoft Outlook for Cisco Unified MeetingPlace Online Help: About Scheduling Meetings on Behalf of Other Users, page 17](#)

Microsoft Outlook for Cisco Unified MeetingPlace Online Help: About Scheduling Meetings on Behalf of Other Users

In the “About Scheduling Meetings on Behalf of Other Users” topic, the fourth bullet is incorrect and should be replaced with the following bullet:

- If your password has expired but has not yet been changed after scheduling a meeting on behalf of a user, the following limitations apply:
 - You cannot reschedule the meeting in the calendar by dragging and dropping the meeting.
 - If the first meeting you open after your password expires is a meeting you scheduled on behalf of a user, you will be prompted to enter a new password, but the password you enter will not be retained. You must open a meeting on your calendar and change the password to prevent this issue.
 - The user cannot reschedule the meeting. The user can still attend the meeting.
 - The user cannot delete the meeting.

Obtaining Documentation, Obtaining Support, and Security Guidelines

For information on obtaining documentation, obtaining support, providing documentation feedback, security guidelines, and also recommended aliases and general Cisco documents, see the monthly *What's New in Cisco Product Documentation*, which also lists all new and revised Cisco technical documentation, at:
