

Preface

The Cisco Aironet 1200 Series Access Point Software Configuration Guide describes how to configure Cisco Aironet 1200 Series Access Points using the web-based management system. This manual also briefly describes how to use the console-based management system.

Audience and Scope

This guide is for the network manager responsible for configuring a wireless network. Before using the material in this guide, you should be familiar with some of the concepts and terminology of Ethernet and wireless local area networking.

The scope of this guide is to provide the information you need to configure an access point, use the access point management system to browse to other devices on a wireless network, and troubleshoot problems with the access point that might arise.

Organization

This guide is organized into the following chapters:

[Chapter 1, “Overview,”](#) is a functional overview of the access point management system. It describes the features of the management system and the access point’s role in a wireless network.

[Chapter 2, “Using the Management Interfaces,”](#) describes how to use the web-based and console-based management interfaces.

[Chapter 3, “Radio Configuration and Basic Settings,”](#) describes how to configure the radios and basic settings, including Ethernet.

[Chapter 4, “Configuring VLANs,”](#) defines virtual local area networks (VLANs) and provides information about configuring and using them.

[Chapter 5, “Configuring Filters and QoS,”](#) defines quality of service (QoS) and provides information on configuring QoS on your access point.

[Chapter 6, “Configuring Proxy Mobile IP,”](#) defines proxy Mobile IP and provides information on configuring this feature on your access point.

[Chapter 7, “Configuring Other Settings,”](#) identifies and describes other configurable settings including server and FTP settings.

[Chapter 8, “Security Setup,”](#) describes how to set up your access point’s security features.

Chapter 9, “Network Management,” describes how to browse to other devices on your network. The chapter also describes how to use Cisco Discovery Protocol (CDP), assign a specific network port to a MAC address, and how to enable wireless network accounting.

Chapter 10, “Managing Firmware and Configurations,” describes how to update firmware on your access point and how to distribute firmware and configurations to other access points.

Chapter 11, “Management System Setup,” explains how to set up your access point to use Simple Network Management Protocol (SNMP), Telnet, Secure Shell (SSH), or the console port to manage the access point.

Chapter 12, “Special Configurations,” describes how to set up the access point in network roles other than a root unit on a wired LAN. The chapter also includes information on Hot Standby mode.

Chapter 13, “Diagnostics and Troubleshooting,” describes the diagnostic pages in the access point’s management system and provides troubleshooting procedures for basic problems you could encounter.

Appendix A, “Channels, Power Levels, and Antenna Gains,” lists the IEEE 802.11a and IEEE 802.11b channels supported by the world’s regulatory domains as well as the maximum power levels and antenna gains allowed per domain.

Appendix B, “Protocol Filter Lists,” lists the protocols you can select for filtering on the management system’s Protocol Filters pages.

Appendix C, “Event Log Messages,” defines event log error messages and recommends corrective action.

Conventions

This publication uses the following conventions to convey instructions and information:

Command descriptions use these conventions:

- Commands and keywords are in **boldface** text.

Notes, tips, and cautions use the following conventions and symbols:

Note

Means *reader take note*. Notes contain helpful suggestions or references to materials not contained in this manual.

Tip

Means *the following are useful tips*.

Caution

Means *reader be careful*. In this situation, you might do something that could result in equipment damage or loss of data.

Related Publications

The following documents provide more information about access points and related products:

- *Quick Start Guide: Cisco Aironet 1200 Series Access Points* describes how to attach cables, power on, and assign an IP address and default gateway for the access point.
- *Cisco Aironet 1200 Series Access Point Hardware Installation Guide* describes the access point's hardware features, its physical and performance characteristics, and how to mount the access point on a wall, ceiling, or desktop. The *Cisco Aironet 1200 Series Access Point Hardware Installation Guide* also contains regulatory information for the device.
- *Cisco Secure Access Control Server for Windows 2000/NT Servers Version 2.6 User Guide* provides complete instructions for using Cisco Secure ACS, including steps for configuring Cisco Secure ACS to support access points.
- *Quick Start Guide: Cisco Aironet Wireless LAN Adapters* describes how to install and configure PC and PCI client adapter cards for use in a wireless LAN.
- *Cisco Aironet Wireless LAN Adapter Installation and Configuration Guide* provides hardware features, physical and performance characteristics, and installation instructions for PC and PCI Card client adapters. It also provides instructions for installing and using the wireless client adapter utilities.
- *Introduction to Mobile IP* is a white paper, available on Cisco.com, that provides an explanation of Mobile IP and how it is used in wired networks.

Obtaining Documentation

Cisco provides several ways to obtain documentation, technical assistance, and other technical resources. These sections explain how to obtain technical information from Cisco Systems.

Cisco.com

You can access the most current Cisco documentation on the World Wide Web at this URL:

<http://www.cisco.com/univercd/home/home.htm>

You can access the Cisco website at this URL:

<http://www.cisco.com>

International Cisco websites can be accessed from this URL:

http://www.cisco.com/public/countries_languages.shtml

Documentation CD-ROM

Cisco documentation and additional literature are available in a Cisco Documentation CD-ROM package, which may have shipped with your product. The Documentation CD-ROM is updated regularly and may be more current than printed documentation. The CD-ROM package is available as a single unit or through an annual or quarterly subscription.

Registered Cisco.com users can order a single Documentation CD-ROM (product number DOC-CONDOCCD=) through the Cisco Ordering tool:

http://www.cisco.com/en/US/partner/ordering/ordering_place_order_ordering_tool_launch.html

All users can order annual or quarterly subscriptions through the online Subscription Store:

<http://www.cisco.com/go/subscription>

Ordering Documentation

You can find instructions for ordering documentation at this URL:

http://www.cisco.com/univercd/cc/td/doc/es_inpk/pdi.htm

You can order Cisco documentation in these ways:

- Registered Cisco.com users (Cisco direct customers) can order Cisco product documentation from the Networking Products MarketPlace:

<http://www.cisco.com/en/US/partner/ordering/index.shtml>

- Nonregistered Cisco.com users can order documentation through a local account representative by calling Cisco Systems Corporate Headquarters (California, USA.) at 408 526-7208 or, elsewhere in North America, by calling 800 553-NETS (6387).

Documentation Feedback

You can submit comments electronically on Cisco.com. On the Cisco Documentation home page, click **Feedback** at the top of the page.

You can send your comments in e-mail to bug-doc@cisco.com.

You can submit comments by using the response card (if present) behind the front cover of your document or by writing to the following address:

Cisco Systems
Attn: Customer Document Ordering
170 West Tasman Drive
San Jose, CA 95134-9883

We appreciate your comments.

Obtaining Technical Assistance

For all customers, partners, resellers, and distributors who hold valid Cisco service contracts, the Cisco Technical Assistance Center (TAC) provides 24-hour, award-winning technical support services, online and over the phone. Cisco.com features the Cisco TAC website as an online starting point for technical assistance.

Cisco TAC Website

The Cisco TAC website (<http://www.cisco.com/tac>) provides online documents and tools for troubleshooting and resolving technical issues with Cisco products and technologies. The Cisco TAC website is available 24 hours a day, 365 days a year.

Accessing all the tools on the Cisco TAC website requires a Cisco.com user ID and password. If you have a valid service contract but do not have a login ID or password, register at this URL:

<http://tools.cisco.com/RPF/register/register.do>

Opening a TAC Case

The online TAC Case Open Tool (<http://www.cisco.com/tac/caseopen>) is the fastest way to open P3 and P4 cases. (Your network is minimally impaired or you require product information). After you describe your situation, the TAC Case Open Tool automatically recommends resources for an immediate solution. If your issue is not resolved using these recommendations, your case will be assigned to a Cisco TAC engineer.

For P1 or P2 cases (your production network is down or severely degraded) or if you do not have Internet access, contact Cisco TAC by telephone. Cisco TAC engineers are assigned immediately to P1 and P2 cases to help keep your business operations running smoothly.

To open a case by telephone, use one of the following numbers:

Asia-Pacific: +61 2 8446 7411 (Australia: 1 800 805 227)

EMEA: +32 2 704 55 55

USA: 1 800 553-2447

For a complete listing of Cisco TAC contacts, go to this URL:

<http://www.cisco.com/warp/public/687/Directory/DirTAC.shtml>

TAC Case Priority Definitions

To ensure that all cases are reported in a standard format, Cisco has established case priority definitions.

Priority 1 (P1)—Your network is “down” or there is a critical impact to your business operations. You and Cisco will commit all necessary resources around the clock to resolve the situation.

Priority 2 (P2)—Operation of an existing network is severely degraded, or significant aspects of your business operation are negatively affected by inadequate performance of Cisco products. You and Cisco will commit full-time resources during normal business hours to resolve the situation.

Priority 3 (P3)—Operational performance of your network is impaired, but most business operations remain functional. You and Cisco will commit resources during normal business hours to restore service to satisfactory levels.

Priority 4 (P4)—You require information or assistance with Cisco product capabilities, installation, or configuration. There is little or no effect on your business operations.

Obtaining Additional Publications and Information

Information about Cisco products, technologies, and network solutions is available from various online and printed sources.

- The *Cisco Product Catalog* describes the networking products offered by Cisco Systems, as well as ordering and customer support services. Access the *Cisco Product Catalog* at this URL:

http://www.cisco.com/en/US/products/products_catalog_links_launch.html

- Cisco Press publishes a wide range of networking publications. Cisco suggests these titles for new and experienced users: *Internetworking Terms and Acronyms Dictionary*, *Internetworking Technology Handbook*, *Internetworking Troubleshooting Guide*, and the *Internetworking Design Guide*. For current Cisco Press titles and other information, go to Cisco Press online at this URL:

<http://www.ciscopress.com>

- Packet magazine is the Cisco quarterly publication that provides the latest networking trends, technology breakthroughs, and Cisco products and solutions to help industry professionals get the most from their networking investment. Included are networking deployment and troubleshooting tips, configuration examples, customer case studies, tutorials and training, certification information, and links to numerous in-depth online resources. You can access Packet magazine at this URL:

<http://www.cisco.com/go/packet>

- iQ Magazine is the Cisco bimonthly publication that delivers the latest information about Internet business strategies for executives. You can access iQ Magazine at this URL:

<http://www.cisco.com/go/iqmagazine>

- Internet Protocol Journal is a quarterly journal published by Cisco Systems for engineering professionals involved in designing, developing, and operating public and private internets and intranets. You can access the Internet Protocol Journal at this URL:

http://www.cisco.com/en/US/about/ac123/ac147/about_cisco_the_internet_protocol_journal.html

- Training—Cisco offers world-class networking training. Current offerings in network training are listed at this URL:

<http://www.cisco.com/en/US/learning/index.html>
