

WUSB200 Setup Wizard/ Network Utility V1.0

Release note V1.0

Initial Release Known issues:

1. Security Monitor - When Admin roams from one AP to another, e.g., from AP1 to AP2 Admin should log out of Security Monitor of AP1 and log in to Security Monitor of AP for proper system behavior.
2. Security Monitor - Avoid using illegal characters, i.e., /\<>:*"□, when creating security monitor Admin or user accounts.
3. USB ports - Please make sure that you are using the same USB port. If inserting WUSB200 into different USB port from original installation, the system can not detect the WUSB200.
