

# Naming Guidelines

---

This appendix provides information about:

- [Naming Rules for Users and Roles, page B-1.](#)
- [Naming Rules for Names and Descriptions, page B-2.](#)

## Naming Rules for Users and Roles

[Table B-1](#) lists the rules for usernames, passwords, and roles. These rules apply to WLSE users configured in the **Administration > User Admin** subtab and to users configured by using the CLI **username** command.

**Table B-1** Allowable Characters for Users and Roles

Type	Rules
User Name	<ul style="list-style-type: none"><li>• No more than 32 characters.</li><li>• Case sensitive.</li><li>• Except for the full stop/period (.) and dash (-), the characters from <a href="#">Table B-2</a></li></ul>
User Password	<ul style="list-style-type: none"><li>• No limit on length.</li><li>• Case sensitive.</li><li>• Any alphanumeric character and the underscore.</li></ul>
Role	<ul style="list-style-type: none"><li>• No more than 32 characters.</li><li>• Case sensitive.</li><li>• Any character from <a href="#">Table B-2</a>.</li></ul>

## Naming Rules for Names and Descriptions

Table B-2 lists the allowable characters for names and descriptions in most WLSE dialogs. The number of characters allowed are:

- Names—no more than 64 characters allowed

**Note** Each job name (configuration, firmware, or AP radio scan) must be unique.

- Descriptions—no more than 256 characters allowed

**Note** Do not use the Enter key in any Description fields.

**Table B-2** Allowable Characters for Names and Descriptions

Character Description	Characters
alphanumeric—upper and lower case	A-Z, a-z, 0-9
