Business

## Highly Secure, High-Bandwidth Connectivity for Your Small Business

Internet access, advanced security, and virtual private network (VPN) access—all in a single, easy-to-use device.

Connections—between employees, customers, partners, and suppliers—are essential to the success of any business. As technology continues to transform how we do business, highly secure, reliable, high-speed connections to the outside world become even more important. The Cisco SR 520-T1 delivers simple, reliable, affordable T1 access to small businesses, with high data rates in both inbound and outbound directions.

As part of the Cisco Small Business Pro Series, the Cisco SR 520-T1 is easy to deploy and manage. It can be deployed in a highly secure, data-only application or be combined with other Pro Series products in powerful, integrated systems that a small business can build on over time.

### The Cisco SR 520-T1 provides:

- High-performance T1 data access.
- Highly secure remote access and site-to-site connectivity with IP Security (IPsec) VPN, Secure Sockets Layer (SSL) VPN, and Easy VPN.
- Strong security features, including a stateful packet inspection firewall, intrusion prevention system, and content filtering to help protect the network from attacks, viruses, worms, and malware.
- Two 10/100 Fast Ethernet ports, providing dependable connectivity for LAN switches in the office. One port can also serve as a network edge (DMZ) to add an additional layer of security to your network.

- Simplified deployment and management: The Cisco SR 520-T1 Configuration Utility streamlines setup of the T1 connection. Cisco Configuration Assistant enables you to fine-tune security settings and manage the Cisco SR 520-T1 as part of a larger system, such as the Cisco Smart Business Communications System (SBCS).
- Easy integration as part of the Cisco Small Business Pro Series: The Cisco SR 520-T1 can be combined with other Pro Series products in powerful, fully integrated systems, such as the Cisco SBCS.

### Service and Support

Products in the Cisco Small Business Pro Series are supported by professionals in Cisco Small Business Support Center locations worldwide who are specifically trained to understand your needs. The Cisco Small Business Support Community, an online forum, enables you to collaborate with your peers and Cisco partners to get answers to your questions.

The Cisco Small Business Pro Service is a device-level, subscription-based service that delivers 3-year “peace of mind” support, including extended access to the Cisco Small Business Support Center, software updates, and next-business-day hardware replacement as necessary.
