

PRODUCT BULLETIN, NO. 2508

CISCO CATALYST 2970 SERIES AND CISCO CATALYST 2948G-GE-TX PRICE REDUCTIONS

Cisco Systems® is pleased to announce a permanent list price reduction of up to 21 percent, effective immediately, on the Cisco Catalyst 2970G-24TS, Cisco Catalyst 2970-24T, and Cisco Catalyst 2948G-GE-TX model switches. Gigabit Ethernet connectivity is even more affordable and intelligent services are easier to deploy for small and medium-sized businesses and enterprise branch offices.

The Cisco® Catalyst® 2970 Series and the Cisco Catalyst 2948G-GE-TX are affordable fixed-configuration Gigabit Ethernet switches that can enhance network performance and increase productivity for small and medium-sized businesses and enterprise branch offices. The Cisco Catalyst 2970 Series of Layer 2+ Gigabit Ethernet switches beats the competition by delivering wire-speed performance with a superior set of intelligent services for today's knowledge workers.

The following two configurations include the Cisco Catalyst 2970 Series:

- *Cisco Catalyst 2970G-24TS*—24 Ethernet 10/100/1000 ports and four small form-factor plug gable (SFP) ports
- *Cisco Catalyst 2970G-24T*—24 Ethernet 10/100/1000 ports

Available with Cisco IOS® Software Enhanced Image (EI), the Cisco Catalyst 2970 Series offers a complete set of intelligent multilayer services to deliver security, quality of service (QoS), and availability with the simplicity of traditional LAN switching. Features such as access control list (ACL) filtering and QoS classification bring security to the edge of the network and enable applications such as IP telephony and real-time streaming multimedia. The Cisco Catalyst 2970 Series supports Smartports macros, a set of verified feature templates per connection type, which greatly reduce the time and complexity of advanced feature deployments, and help customers to take advantage of Cisco best-practices and achieve implementation consistency across multiple switch devices.

The Cisco Catalyst 2948G-GE-TX Gigabit Ethernet switch enhances network performance and productivity with the highest 10/100/1000 Mbps port density in a 1 rack unit (RU) form factor in the networking industry. The Cisco Catalyst 2948G-GE-TX has 48 autosensing 10/100/1000BASE-T ports and 4 wire-speed SFP ports, providing a total of 52 Gigabit Ethernet ports. The Cisco Catalyst 2948G-GE-TX uses the same feature-rich Cisco Catalyst OS software as the Cisco Catalyst 2948G, the Cisco Catalyst 2980G-A, and Cisco Catalyst 4000 Series switches.

For higher density and feature-rich enterprise class Gigabit Ethernet solutions, Cisco Systems is offering its premium Cisco Catalyst 3750 high-speed stackable product line and a complete modular switching portfolio based upon the Cisco Catalyst 4500 and Catalyst 6500 series products.

ORDERING INFO

Model Number	Product Description
WS-C2970G-24TS-E	<ul style="list-style-type: none">• 24 10/100/1000 ports and 4 SFP uplinks• 1.5 RU standalone switch• EI software with intelligent multilayer services
WS-C2970G-24T-E	<ul style="list-style-type: none">• 24 10/100/1000 ports• 1 RU standalone switch• EI software with intelligent multilayer services
WS-C2948G-GE-TX	<ul style="list-style-type: none">• 48 10/100/1000 ports and 4 SFP uplinks• 1 RU standalone switch• Cisco Catalyst OS software

PRODUCT AVAILABILITY

The Cisco Catalyst 2970 Series and Cisco Catalyst 2948G-GE-TX switches can be ordered now. For more information, go to the following URLs:
