

SciCare Broadband Services

Automated Backup

Description*

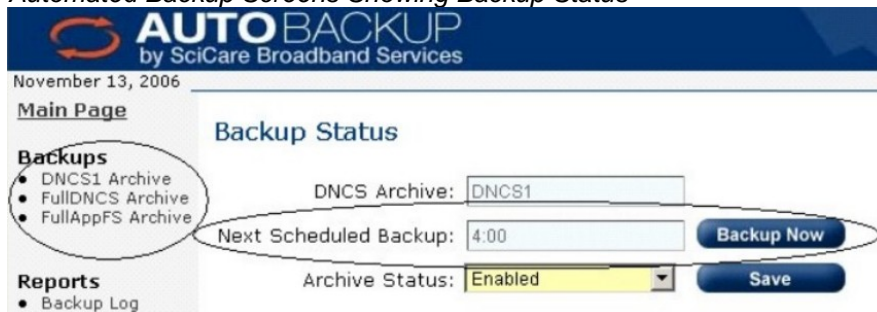

SciCare™ Broadband Services' Automated Backup Solution for the Scientific Atlanta DNCS is an integrated, comprehensive backup solution designed for your specific network configuration. Through an intuitive Graphical User Interface, staff members can schedule regular backups, restore the system from any of multiple copies of backups, and configure the system to provide notification when a backup is initiated, completed, successful or unsuccessful. Backups are completely digital, thus faster and more reliable than commonly used tapes. As a result, it is easier to locate the Backup Solution in your network, which better secures your data in the event of disaster.

- Schedule backups or run an immediate *Backup Now*
- Archive multiple sets of the DNCS file system, database and key files
- Backup the Scientific Atlanta Application Server file system
- Navigate the easy-to-use web interface
- Email notification of backup status
- Use fast Ethernet or Gigabit Ethernet to backup directly to disk
- Perform a bare metal restore to the DNCS
- Manage backups with greater accuracy and precision
- Protect your system with remotely stored and created backups
- Reduce the manpower required to manage DNCS backups and simplify system restores
- Reduce costly, cumbersome tapes and tape storage
- Help minimize system and services outage time
- Help improve your subscribers' overall experience and confidence in you

* The system can also be used to reduce subscriber impact due to upgrades and maintenance.

Automated Backup Screens Showing Backup Status

Backup Sets

Date	Name	Status	Write Protected	Comments	Action
2006-07-21 13:25	set11	Complete	No		Edit Restore

Email notification of Backup Status

	From	Subject	Received	Size
✉	AutoBackup Server	Failed Backup Notification (DNCS1)	Fri 11/10/2006 4:03 AM	4 KB
✉	AutoBackup Server	Successful Backup Notification (DNCS1)	Thu 11/9/2006 4:01 AM	6 KB
✉	AutoBackup Server	Successful Backup Notification (DNCS1)	Wed 11/8/2006 4:00 AM	6 KB

New Features**

- Multiple User IDs; emails customized to user
- DB and DBDS key files restore to cold standby DNCS
- Full file system dump of DNCS and Application Server
- Support for expanded external storage
- Reconfigured boot disk partitions for improved system stability

Additional Features**

Each order includes:

- A SunFire V240 server running Solaris 9 and the Auto Backup Software
- 73 Gigabytes of backup storage
- N+1 dual power supplies
- Auto Backup Installation and Interface Guide
- Recovery DVD

Customers will need to provide:

- 2 Rack Units in a rack at least 30 inches deep
- 2 circuits with 300 watts of power capacity
- Fast Ethernet (100 megabit) connection between the DNCS and Auto Backup Server (Gigabit Ethernet is also supported)
- Ethernet connectivity to office LAN for easy Web interface access (optional)
- SMTP Mail relay service to forward email status from the Auto Backup server
