

Cisco Security Agent Version 6.0.1

PB530470

Product Overview

Cisco® Security Agent is the only endpoint security solution that protects laptops, desktops, and servers from new malware threats and confidential data loss, while providing a lower total cost of ownership. Unlike other endpoint security solutions, Cisco Security Agent secures endpoints while they are on or off the corporate network, using tightly integrated behavior-based detection, data loss prevention, intrusion prevention, antivirus, antispymware, acceptable use, and compliance policies—providing proven and persistent protection.

Table 1 lists features of Cisco Security Agent Version 6.0.1.

Table 1. Cisco Security Agent Version 6.0.1 Features

Feature	Description
High-Availability Configuration	Provides additional redundancy with graceful failover for Cisco Security Agent deployments
New Pre-Built Reports	Offers ongoing protection and enhanced visibility into the Cisco Security Agent deployment
Virtualized Management Console Support	Provides VMWare ESX support for virtualized environments

New Features

Additional new features of Cisco Security Agent Version 6.0.1 include:

- Performance improvements for data loss prevention and antivirus scanning
- Additional operating system support for agent platforms
- Standalone agent IPv6 enhancement for standalone agents

Upgrade Paths

Cisco Security Agent Version 6.0.1 provides new features and an upgrade path for all existing Cisco Security Agent customers. All Cisco Security Agent customers who have purchased Cisco Software Application Support (SAS) or Software Application Support Plus Upgrades (SASU) are entitled to upgrade from prior versions of Cisco Security Agent to Cisco Security Agent Version 6.0.1.

Availability

Cisco Security Agent 6.0.1 will be available in April 2009.
