

Fast Forward to Success: It's Easy with Cisco's Fast Track Migration Service

Cisco Fast Track Migration Service allows you to

- Take advantage of the latest unified communications technology, seamlessly
- Provide a strong return on your IT investment
- Lay the foundation for continued innovation without disrupting your business
- Make better decisions by accessing the right information where and when you need it

With Cisco's Fast Track Migration Service, your company can gain—and maintain—that competitive edge now.

Introduction

Today's dynamic workplace demands solutions that deliver open, flexible, and secure communications that reach far beyond enterprise borders. Businesses today are rushing to embrace collaboration as a way to accelerate decisions, gain productivity, and strengthen competitive advantage. Cisco® Advanced Services will seamlessly migrate organizations to the most current Cisco Unified Communications Manager software release to enable collaboration and communication everywhere, every time, while maximizing business productivity.

Migrating to the most current version of Cisco Unified Communications Manager software release provides a strong return on your IT investment today and tomorrow. It lays the foundation for continued innovation without business disruption. Cisco Unified Communications supports your investment in existing systems and business applications while allowing users to realize the power of Web 2.0.

Power to the People

Cisco Unified Communications integrates voice, video, data, and mobile applications across fixed and mobile networks so people can work together more effectively, with integrated web conferencing and video conferencing technologies and “find me, follow me” features that transcend distance:

- **Make better decisions** by accessing the right information where you need it and when you need it
- **Communicate reliably** and safely with advanced security features
- **Improve customer satisfaction** by enabling a 360-degree view of customer knowledge unlimited by location or touch

Why Migrate?

Migrating to the most current version of Cisco Unified Communications Manager software release provides enhanced network performance and security, improved operational efficiency, and optimized routing and switching. It lays the foundation for integrating new technologies with greater ease:

- Wide range of new productivity-enhancing applications, such as presence, click to dial, video, and many others from Cisco and partners
- Appliance-based or virtualized environments allow simpler, faster installs and upgrades
- Improved security, stability, and performance
- Exceptional user experience
- Simpler, more secure management
- Improved database resiliency
- Greater scalability
- Enhanced WAN clustering capabilities

Cisco's Fast Track Migration Service gets you there faster. Based on proven methodologies and industry best practices, this new service accelerates deployment time and provides the ability to migrate at significantly reduced prices. This phased approach will provide your organization with critical requirement analysis testing, planning, and implementation that are implemented easily. By taking advantage of the most current software version of Cisco Unified Communications Manager, your organization can gain the benefits of richer, more collaborative communications, faster and with less risk.

Do You Qualify?

The Cisco Planning and Design Fast Track Migration Service is ideal for current Cisco Unified Communications customers who want to:

- Migrate from select versions of Cisco Unified Communications Manager 4.x (Windows-based versions) to an appliance-based version
- Migrate from an appliance-based version to a later version
- Migrate from a server-based to a virtualized environment
- Upgrade to 30,000 endpoints
