

## SMB CLASS SOLUTIONS SECURE NETWORK FOUNDATION

The Cisco® Secure Network Foundation is an integrated solution that delivers consistent, secure services to all users – wired or wireless, helping businesses increase productivity, enhance information system resiliency and reduce costs. The Cisco Secure Network Foundation is comprised of routers, switches, wireless access points and secure endpoints.

### Business benefits

A Cisco Secure Network Foundation can help you to avoid business disruption from internal and external security threats, streamline operations and reduce operating costs with an integrated network, and empower your employees to be more responsive to customers while at work, at home or on the road. The modularity of the Cisco Secure Network Foundation allows organisations to add components or capacity as business needs dictate. Cisco solutions are offered with the industry-leading technical support services available through Cisco SMARTnet® service offerings.

A Cisco Secure Network Foundation:

- Helps protect your company against known and unknown threats.
- Helps to improve operational efficiencies.
- Grows and adapts with emerging business and security requirements.
- Provides a migration path to new network services such as IP telephony, video and wireless.
- Is backed by the industry's leading technical support services.

Deploying the right network foundation can contribute to an organisation's competitiveness and profitability.
