

Deploying advanced applications enables small and medium-sized businesses (SMBs) to increase employee productivity, collaboration, customer responsiveness, and profitability. The Cisco® Secure Wireless Office Solution is comprehensive, tailored, and integrated to help SMBs create an intelligent, empowered environment. The Cisco Secure Wireless Office Solution is comprised of routers, access points, and switches.

Cisco Systems provides blueprints for extending network capability to support advanced applications in businesses that have 20 to 500 users. These blueprints are based on Cisco's extensive experience in creating networks for successful SMBs.

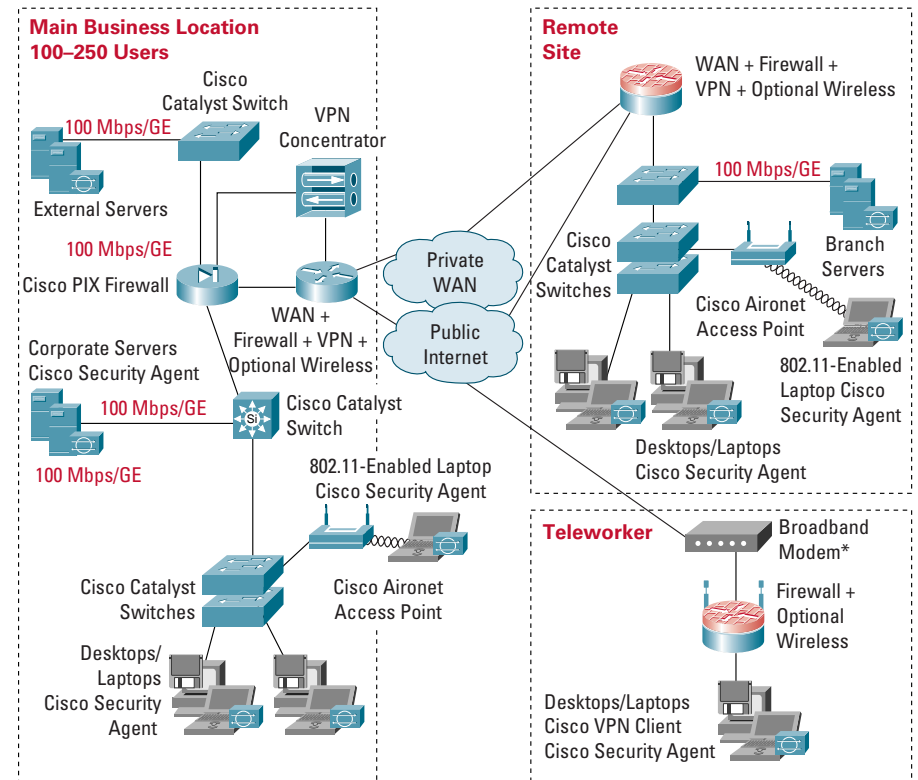

- Cisco secure wireless blueprints for SMBs are formulated according to size:
- Secure Wireless Blueprint: 20 to 100 user ports per site
- Secure Wireless Blueprint: 100 to 250 user ports per site
- Secure Wireless Blueprint: 250 to 500 user ports per site

Figure 1: Network Diagram for SMBs with 20–100 User Ports per Site

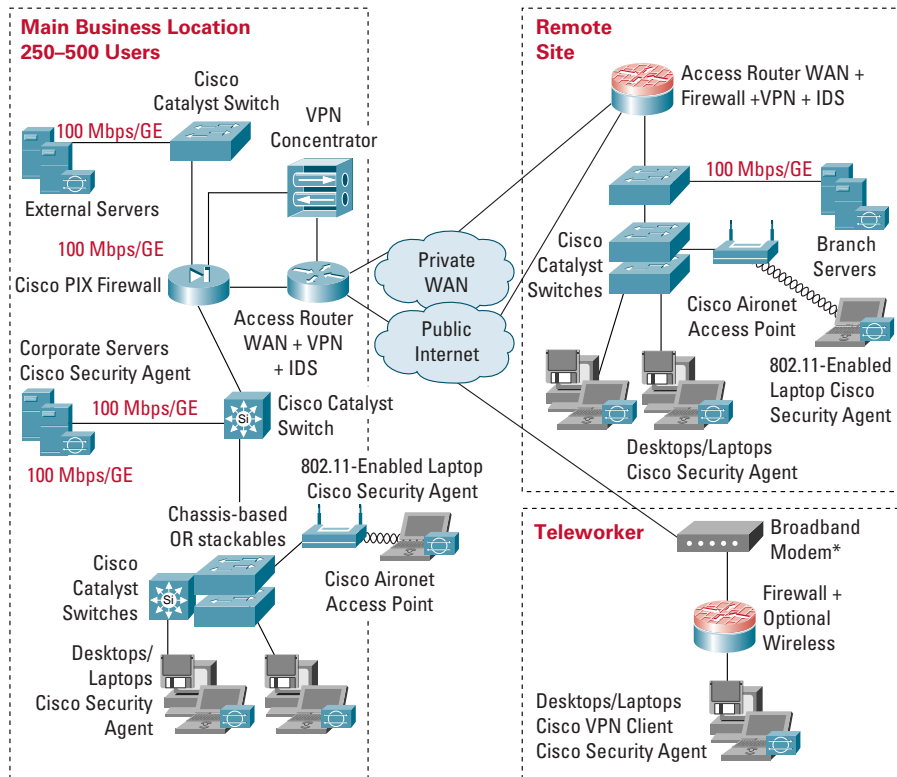

* not required by all service providers

Figure 2: Network Diagram for SMBs with 100–250 User Ports per Site

* not required by all service providers

Business Benefits

The Cisco Secure Wireless Office Solution enables employees to securely access communications tools and network resources from anywhere inside the office, so that they can be more productive, collaborative, and responsive to customers. The modularity of the Cisco Secure Wireless Office Solution allows organizations to add components or capacity as business needs dictate. Cisco solutions are offered with the industry-leading technical support services available through Cisco SMARTnet® service offerings.

The Cisco Secure Wireless Office Solution is:

- Comprehensive—One complete solution centralizes networking management, eliminating the nuisance of maintaining a multisource network.
- Reliable and responsive—The convergence of voice, video, and data fosters employee productivity, satisfaction, and collaboration.
- Secure—Security technologies embedded into the Cisco Secure Wireless Office Solution pervasively protect the SMB network.
- Cost-effective—Integrated, interoperable components provide a single-source solution that is easy to deploy today and simple to scale tomorrow.

Solution Components

The Cisco Secure Wireless Office Solution assembles an array of wireless, security, and IP Communications capabilities into a comprehensive package that can be customized to suit individual system specifications. The Cisco Secure Wireless Office Solution includes:

Products and Technologies	Description
A new portfolio of Cisco integrated services routers	Provides enhanced sophistication in SMB routing, integrating wireless directly onto the router for simplified, secure wireless access
Cisco Aironet® access points	Provide a highly secure, standards-based solution that offers a unique mix of flexibility and manageability
Cisco Catalyst® switches	Extend the network's security and services to users throughout the wired and wireless network
