

# Cisco IOS Software Release 11.3(2)XA

## Introduction

This Product Bulletin describes the new platform introduced in Cisco IOS(TM) software release 11.3(2)XA. It should be used in conjunction with Product Bulletin #712, Cisco IOS Software Release 11.3T

New Features.

11.3(2)XA is an Early Deployment (ED) release. This release is focused on delivering the Cisco 2600 and Cisco uBR7246 Universal Broadband Router platforms to market. Any ED release of software should be utilized first in a test network before being deployed in a production network.

The platform support delivered with this ED release will be immediately incorporated into the 11.3(3)T release and subsequent 11.3T releases. As such, maintenance for both of these platforms should be obtained from the 11.3T release. For more information about the Cisco IOS software release process, please see Product Bulletin #537.
