

# Cisco IP/VC Quick Product Overview

The Cisco videoconferencing solution is the Cisco IP/VC product family. This product family is primarily comprised of the Cisco IP/VC 3500 Series which consists of the Cisco IP/VC 3510 Multipoint Control Unit (MCU), the Cisco IP/VC 3520 and IP/VC 3525 Videoconferencing Gateways, and the Cisco IP/VC 3530 Video Terminal Adapter (VTA).

The Cisco IP/VC 3510 MCU allows multiple participants in multiple locations to attend the same meeting with full real-time interactivity. The IP/VC 3520/3525 Gateways let users connect their ISDN-based H.320 systems to IP-based H.323 videoconferencing endpoints. And the IP/VC 3530 Video Terminal Adapter (VTA) connects a single H.320 room-based system to an IP network.

In addition, there is the Cisco Multimedia Conference Manager, which is an H.323 Gatekeeper/Proxy. Combine these Cisco products with any H.323-compliant endpoint, all running over a Cisco IP network infrastructure, and you create a complete videoconferencing solution.

These products, and the solutions they enable, such as collaborative meetings, conferences, distance learning, and more, are developed for enterprises and service providers who want a reliable and cost-effective network infrastructure for videoconferencing application deployment. Cisco videoconferencing products enable video applications over IP networks and, at the same time, integrate legacy H.320 systems—protecting an enterprise's original investment in videoconferencing.

**Corporate Headquarters**

Cisco Systems, Inc.  
170 West Tasman Drive  
San Jose, CA 95134-1706  
USA
