Product Migration Options

For any new DWDM links that customers need to deploy, two products are available, each suited for a different application:

- For metro/regional applications, the new Cisco ONS 15454 MSTP platform offers more client interfaces and next-generation OAM&P functions. For more information, visit: <http://cisco.com/en/US/products/hw/optical/ps2006/index.html>

Customers who are upgrading their already installed routes should place a last buy on or before the end-of-sale date to cover expected wavelength forecast.
