

End of Life Announcement for Commercial Temperature (C-Temp) cards for Cisco ONS 15327 Multiservice Platform

This product bulletin serves as formal notification that the ONS 15327 circuit packs outlined below in Table 1 will reach End of Life (EOL) status according to the EOL schedule listed in Table 2. In an on-going effort to deliver the best in class optical transport solutions, Cisco will be phasing out the C-Temp circuit packs and will introduce enhanced Industrial Temperature (I-Temp) rated for operation at -40 to 65° Celsius.

Backward Compatibility

- **Equipment Functionality**—The listed replacement product names (circuit packs) are functionally equivalent to the EoL products. The replacement circuit packs are qualified for Industrial Temperature (I-Temp) conditions to operate at –40 to 65(Celsius, non-condensing operating environment. Replacement circuit packs and assemblies can be distinguished with a ‘-T’ part number suffix and may also be distinguished by the thermometer symbol on the card faceplate.
 - The replacement circuit packs can operate in systems and networks with the EoL circuit packs
 - Fan Tray Assembly, 15327-FTA(=) are currently I-Temp rated. New 15327 I-Temp circuit packs can be installed in existing FTAs to meet I-Temp operating conditions.
- **Software Support**—Replacement product names will operate with existing system software. No new software will be required to support the replacement products.
