

Cisco IOS Software Release 12.2(4)YG

This Product Bulletin describes the new Cisco IOS® Software Release 12.2(4)YG.

New Features

IP Firewall Feature Set

The release incorporates the Cisco IOS minimum memory initiative, allowing the default image to be changed from IP to IP Firewall for the Cisco SOHO 76 and SOHO 77H routers. The default image for the Cisco SOHO 77 will still remain the base IP feature set.

Detailed Information

12.2(5)YG is an Early Deployment (ED) release. This release delivers a reduced memory usage core to the Cisco SOHO series routers which extends the life of the platforms with the existing memory configuration.

The savings also enable the introduction of support for the IP Firewall as the new default feature set for the Cisco SOHO 76 and Cisco SOHO 77H.
