**Dylan Morison**  
**Data Centre Portfolio Manager**  
**Cisco Australia and New Zealand**

Dylan Morison is the Data Centre Portfolio Manager for Cisco in Australia and New Zealand. In his role, Dylan is responsible for leading the data centre sales teams for high-speed data centre Ethernet and Fibre Channel switching systems and advanced L4-7 services. This includes the next-generation Cisco Unified Computing System and Nexus Series Switches and key programs building a Unified Fabric in the Data Centre.

Dylan has been with Cisco for more than 10 years and has played a number of key roles in switching and storage hardware, software and systems architecture development across Cisco. The past five years have been as the Data Centre lead for Australia and New Zealand.

Prior to joining Cisco, Dylan has worked in the IT industry for 14 years, including two years at Ninemsn as Business Development Manager and two years at Tech Pacific, a distributor of IT technology.

Dylan has also held positions on the Storage Networking Industry Association (SNIA) board of directors promoting the storage networking and information management industries.
