Acquire the technology you need today, and pay for it later!

Organizations in every industry continue to look for ways to make real-time business decisions that support a dynamic marketplace. Without scalable infrastructure that can store, process, and analyze big data sets in real time, companies are unable to use information to your best advantage. The Cisco® Starter Scale-Out Solution for SAP HANA with EMC Storage is priced to make it easy to get started on the path to better business decisions that lets you stay ahead of the competition.

SAP HANA: Delivering Instant Insight into Operations

SAP HANA provides a flexible, cost-effective approach for analyzing detailed data in real time—literally at the speed of thought. Efficient processing and analysis of massive amounts of data is made possible by combining SAP's intelligent use of in-memory technology, columnar database design, data compression, and massively parallel processing into an integrated solution. Using the multipurpose SAP HANA database, organizations can gain instant insight into business operations, respond quickly to changing priorities, and dramatically reduce the costs associated with the deployment of multiple data warehouses and operations and analytical systems.

Cisco Capital® financing allows you to acquire Cisco solutions without a large upfront cash investment. We are helping to make it even easier and more affordable to secure the technology your business needs with no payments or interest for the first three months. Support your business’ technology needs on your own terms and timeframe—not the ones dictated by your budget.

Offer Details*

Turn a large upfront investment into predictable monthly or periodic payments with this special offer:

- 3 months free from payments and interest
- 3 months included within term
