

Lab Five : Manageability

Lab Overview

In this lab you will learn how to remote manage the Aironet Access Point and the BBSM using the Web browser.

Objectives

Upon completion of this lab, you will be able to:

- Use the browser to remote manage the Aironet Access Point.
- Use the browser to remote manage the Cisco Catalyst Switch.
- Use the browser to remote manage the BBSM Server.

Task One : Managing Aironet Access Point using the browser

1. Open browser and **goto** <http://<AP's IP >>
2. You're now able to configure and manage the LRE switch through the browser.

Task Two : Manage the BBSM from Remote browser

1. Connect all the equipment according to the network setup.
2. Open the browser from the client and login from the Splash page.
3. Once authenticated, **goto** <http://<BBSM IP>/www>
4. You'll be prompted to login. **Login** with the BBSM Administrator username and password.
5. Leave the Domain empty.
6. You'll now be able to see the BBSM Main Dashboard Page.
7. You can now configure and manage the BBSM server through the browser.
