

Celcom Axiata Berhad

- Unprecedented 15 consecutive quarters of growth
- Leading mobile broadband provider in Malaysia
- Widest coverage Celcom's 3G services are available at the peak of Mount Kinabalu and its 2G services are accessible at the Maliau Basin in the remote jungles of Sabah
- With more than 10.1 million users on its network, Celcom is one of the largest telecommunications service providers in Malaysia and the region.

Its core business remains prepaid and postpaid mobile voice services, but Celcom has also achieved significant growth in mobile broadband, m-commerce, enterprise solutions and bulk wholesale services.

Celcom continues to have the widest network coverage in the country. Through ongoing investments in network coverage, capacity and performance, Celcom intends to maintain its leadership and position in technology as the country's best mobile service provid

Celcom Wireless Leased Line

- Celcom Wireless Leased Line operating since 1994
- Celcom Wireless Leased Line is available either as a 'Point to Point' line facilitating the transfer of data between two or more offices or as an 'Internet Access' line via Celcom's Internet Point of Presence providing an office with a high-speed, reliable method of connecting to the internet.
- Each wireless leased line is dedicated to an individual company delivering a private and secure service, with uncontended access.
- Nationwide service coverage
- SLA 99.95%

Why Wireless?

- Scalability, flexibility, robustness and mobility of the network supporting the surveillance system deployment
- Weatherproof and non-sensitivity to bad weather
- Reduces deployment and maintenance cost
- Minimize the need for new ground infrastructure trenching
- Fast deployment virtually anywhere

Slow installations?

Not with Celcom Wireless Leased Line No way-leave, no road to dig up, no excuses

Wireless Digital Microwave System

- The Outstanding new generation microwave equipment
- Frequency range is 7GHz to 38GHz
- Capacities range is 2Mbps to 155Mbps
- Design for high reliability
- Compact and small size with indoor/outdoor design
- Friendly management interface
- Simple and quick installation

Point to Point & Point to Multipoint

For the Point to Point or Point to Multipoint service, a receiver dish is installed on the two or more premises to be linked by the wireless leased line. The line transmits radio or microwave technology frequencies to a receiver, giving the same high quality as a fixed line.

Celcom's wireless leased line service is an excellent alternative to traditional fixed leased lines, particularly for those companies which are in remote locations or want a competitively priced wireless solution

It can be also a great back-up solution for organisations with an existing fixed-line application.

Simple!
The fixed pricing model
