Where Am I? How Do I Start?

With Services From Cisco and Our Partners

Plan

How do I architect my network to allow secure, seamless wired and wireless access?

How do I align my IT investments to best support my business strategy?

How can I adapt and scale my network access solution?

How can I make my IT infrastructure and facilities as efficient as possible?

Build

How can I deploy solutions without disrupting my network?

How can I efficiently migrate and implement a solution?

How can I ensure the solution is implemented correctly, on time, and on budget?

Run

How can I reduce the complexity of managing the network?

How can I get the best total cost of ownership?

How can I tap the intelligence in my network and use it to advantage?

How can I get better at anticipating and resolving issues?

Realize the Full Value of Your Borderless Network Investment

Enable
the Architecture

Speed

architectural planning
and design to capture
business and
market transitions

Enable
Business Solutions

Scale

solutions
to strengthen
secure collaboration,
compliance, and
energy management

Enable
a Smart Network

Leverage

network
intelligence to
manage your network
for high performance
and efficiency

With Services from Cisco and Our Partners

Enable the Architecture

- Network Architecture Discovery Service

Guidance in analyzing the merits of various technology options and solutions

Multiday architecture and design workshop

Pilot

- Network Architecture Assessment Service

Generate a networking strategy and roadmap

8- to 10-week engagement

Pilot

- Network Architecture Planning and Design Service

Guidance for detailed design and implementation

4- to 5-month engagement

Pilot

Enable Business Solutions (1 of 2)

Professional Services to Scale Solutions Across Your Business

Energy Management

Services for Energy Management

Security

TrustSec Readiness and Deployment

Medianet

Medianet Readiness Assessment

Enable Business Solutions (2 of 2)

Professional Services to Scale Solutions Across Your Business

Wireless LAN

802.11n Migration

Security

IT GRC Assessment

Enable a Smart Network (1 of 2)

- Cisco Network Optimization Service

Strengthen your security infrastructure; improve availability and support for wireless network devices

Prepare your network to support new technologies and applications

- Cisco SMARTnet Service

Shorten resolution time and resolve issues before business is affected

Proactive diagnostics and real-time alerts are available on selected devices with the Smart Call Home feature

- Cisco Remote Management Services

Proactive monitoring and management of borderless network technologies

Enable a Smart Network (2 of 2)

- Cisco Security IntelliShield Alert Manager Service

Identify, prevent, and mitigate IT attacks with real-time threat alerts and proven mitigation solutions

- Cisco Smart Care Service

Proactively verify your network is secure, reliable, and functioning optimally – for small and medium businesses

Why Cisco Services?

Networking Expertise

Tested, proven architectures
Breadth and depth of expertise for complex multitechnology solutions

Collaborative Approach with Partners

Unmatched scalability and coverage
Complementary expertise

Intelligent, Personalized Services

Proactive, predictive network-level services
Sharing of knowledge and leading practices to enable your success

Innovative Solutions

Modular, scalable architectures
Services for specialized business applications

Improve the Customer Experience Through Technology Innovation
